Job # 2018-011

PLEASE POST ANTICIPATED OPENING

POSITION: Wastewater Facilities Manager
Wastewater Treatment Plant

HOURS OF WORK: Full-time/40 hours per week

SALARY: \$1,237.79 - \$1,662.17 per week
(According to Contractual Salary Schedule)

GENERAL STATEMENT OF DUTIES AND RESPONSIBILITIES:

The Wastewater Facilities Manager is responsible for leading, planning, directing, managing, supervising, and overseeing the activities and operations of the wastewater treatment plant, pumping station and related facilities as assigned. Work is performed with latitude for the exercise of independent judgment and action to achieve regulatory compliance, effective wastewater treatment, and efficient operation and maintenance.

SUPERVISION RECEIVED:

Detour Plan works under the direct supervision of the DPW Director and Deputy DPW Director.

SUPERVISION EXERCISED:

Wastewater Facilities Manager supervises assigned operations, maintenance, laboratory, and administrative staff. Supervise wastewater collection system employees during the absence of the Collection System Supervisor.

EXAMPLES OF DUTIES AND RESPONSIBILITIES:

- Ensure compliance with federal, state and local regulations; regulatory permits; and enforcement orders for assigned wastewater facilities and resources; complies with NPDES permit(s).
- Maximize the use of labor, equipment, and financial resources to ensure efficient and effective operation and maintenance of the wastewater facilities.
- Prepares and administers work schedules for assigned operations and maintenance personnel. Manages assigned personnel to ensure that they execute their duties effectively and efficiently.
- Evaluates laboratory tests, process data and other information (weather, regulatory reports, etc.) to improve facility performance and efficiency, and comply with regulations.
- Manages personnel in the execution of facility maintenance activities assuring that assets perform their required functions, while maintaining the lowest lifecycle costs.
- Manage the development, update and implementation of standard operating procedures, manuals, policies, employee training programs, emergency response plans, and health and safety programs to ensure efficient and safe operations; ensure employee adherence and issue necessary orders.

EXAMPLES OF DUTIES AND RESPONSIBILITIES: (continued)

- Oversees sampling, testing, and process control of wastewater, receiving waters, sludge samples and wastewater from industrial dischargers.
- Maintains facilities in such a manner that they are clean, safe and efficient.
- Manages facility personnel and resources to ensure appropriate monitoring and record keeping including regulatory, process and administrative records.
- Develops and implements appropriate corrective actions and procedures during emergencies.
- Regularly confers with local, state and federal officials, peers, and consultants regarding technical and administrative matters to ensure regulatory compliance, effective wastewater treatment and efficient operation and maintenance.
- Evaluates, recommends and implements process changes, new treatment processes and capital investments to ensure regulatory compliance and improve water quality, treatment effectiveness and operational efficiency.
- Prepares and administers the budget for assigned wastewater facilities; oversee expenditures; monitors expenditures versus the approved budget, reporting any important trends or variances; and prepares forecasts of expenditures. Implement adjustments.
- Prepare reports and information regarding wastewater O&M, activities, finances and projects for a variety of audiences.
- Ensures customer service requests, inquiries and complaints are resolved in a courteous, effective and timely manner.
- Oversees the completion of all monthly process monitoring reports and annual reports.
- Reviews time cards and prepares payroll data; maintains records of vacations, personal leave, holiday options, sick leave, family sick leave, sewer call assistance, shift swaps, overtime, etc.
- Makes recommendations in personnel matters such as hiring, promotions, transfers, disciplinary action, grievances and discharge.
- Maintains 24/7 on-call status to respond to emergencies; keeps abreast of issues to coordinate efforts in solution of them and comply with regulatory reporting requirements.

The duties listed above are intended only as illustrations of the various types of work that may be performed. The omission of specific statements of duties does not exclude them from the position if the work is similar, related or a logical assignment to the position.

ENTRANCE REQUIREMENTS:

- Possession of Grade 7 Massachusetts Wastewater Treatment Plant Operator certification (Full Operator Status).
- At least eight (8) years of operational experience, responsible for the operation and process control of wastewater, industrial waste, or water treatment plants; two (2) years of which shall be in similar size and/or complexity wastewater treatment facility as the City of Haverhill's Wastewater Treatment Plant.
- A B.S. degree in engineering, science or a related field from an accredited college or university is preferred. The degree maybe considered a substitute for four (4) years of experience.

QUALIFICATIONS, KNOWLEDGE AND ABILITIES:

- Comprehensive knowledge about the O&M of large activated sludge facilities, municipal collection systems and pumping stations.
- Demonstrated ability to effectively lead, supervise, manage, coordinate, and train wastewater personnel.
- Proven performance establishing and maintaining effective working relationships with subordinates, superiors and the public.

QUALIFICATIONS, KNOWLEDGE AND ABILITIES: (continued)

- Working knowledge of industrial wastes and their effects on municipal treatment processes and equipment.
- Ability to interpret data and laboratory test results on wastewater and sludge unit processes, troubleshoot wastewater operations and equipment, and to modify unit processes to ensure efficient daily operations and regulatory compliance.
- Comprehensive knowledge of instrumentation and control equipment used in wastewater treatment processes.
- Experience with Hach WIMS, SCADA, Microsoft Office applications, general ledger software, computerized maintenance management systems (CMMS) and geographic information systems (GIS).
- Experience developing and managing budgets, finances and wastewater data.
- Skills in written and oral communication at a level necessary for efficient job performance.

PHYSICAL REQUIREMENTS:

- Position splits time between office, field, wastewater facilities and commercial and industrial facilities. Travel is required by motor vehicle to various sites and facilities locally, and occasionally regionally.
- Various duties are performed outdoors and may occur during inclement weather conditions.
- Requires walking, bending, kneeling, reaching, squatting and climbing while making inspections.
- Requires movement in and out of a vehicle, around office areas, commercial and industrial facilities, construction sites, wastewater facilities pumping stations and related facilities.
- Must be able to lift up to 50 pounds and access facilities, including confined spaces.
- Tasks may require exposure to hazardous materials and atmospheres typical of wastewater treatment plants and pumping stations.

Attendance is mandatory.

Applicants will be required to undergo a background check including CORI screening prior to appointment.
