## **Mayor Fiorentini Submits Testimony to Request MBTA Infrastructure and Service Improvements**

Mayor James J. Fiorentini announced he submitted testimony at the request of Lieutenant Governor Polito to request that the MBTA institute a finance control board to help ensure that the system is running as efficiently as possible, to improve infrastructure and service for the MBTA and build back the much needed public confidence in the public transportation system. This winter revealed the deficiencies in the MBTA and it is critical that the state support our antiquated public transportation system.

The Mayor's testimony is attached for your review.

Mayor James J. Fiorentini stated:

“We are fortunate to have two MBTA stations in our city, but our residents need to continue to rely on a reliable and convenient transit system.

“I am hopeful that the current administration will respond to the request of the citizens for a more reliable public transit system and institute a finance control board in order to ensure that the MBTA will run efficiently and make the MBTA more reliable for its commuters.”
