## **Mayor Submits Capital Improvement Plan to Council to get New Snow Machines in time for the Winter**

Tomorrow night, Mayor James J. Fiorentini will ask the City Council to approve his Capital Improvement Plan that he submitted last week for the City Council to review. As part of the plan, there is a request to refurbish an existing 17 year old snow blower as well as a request to purchase a new frontend loader snow blower from Snogo.

This powerful machine has a cutting width of 9 feet and can fill up ten dump trucks within 4 minutes, which shows its strength and efficiency to remove snow from snow clogged streets. By the end of December, both machines are expected be in operation. The cost to refurbish the existing machine is \$40,000 and the cost to purchase a new machine is \$150,000.

Mayor Fiorentini stated:

“As part of our on-going Capital Improvement Plan, we are refurbishing one of existing vehicles and ordering a new machine for snow removal. I wanted to make sure our Department of Public Works had both machines operational by the beginning of the snow season.

“These vehicles will clear the streets from snow and make them safer for residents to travel on after snow storms.”
