FOR IMMEDIATE RELEASE:

Mayor Puts Water Cannon at Riverside Park to Cool Residents

HAVERHILL- Today, Mayor James J. Fiorentini announced that he has put a water cannon at Riverside Park to help cool residents during the heatwave this week. The mayor has implemented water cannons over the last few years to help give relief to residents from the hot weather.

Swasey Field is also ready to cool residents with their water park that was installed last year. This area is a great place for families to go to play and cool off during the summer. If people need a place with air conditioning, please feel free to visit our Citizen's Center on Welcome Street, they are open Monday thru Friday from 8AM until 4PM. If you are a senior citizen and need a place to go when the center is closed, please call the Haverhill Police Department at 978-373-1212 and they will call us and we will make arrangements to take care of your needs.

Mayor Fiorentini said:

“We have installed a water cannon at Riverside Park to help residents cool off during the heatwave. Please make sure you stay hydrated and check on your neighbors to make sure they are okay during this heatwave.

“I want to make sure all of our residents have a place to go to cool off during the heatwave. I urge all seniors who are in need of cooling services to go to the Citizen's Center during business hours or call the Haverhill Police Department during non-business hours and they will contact us to assist you with services.”
