401 WQC Application Completion on 7/21/23

RE: Application for: COMBINED PERMIT – BRP WW 26
401 WATER QUALITY CERTIFICATION FOR MAJOR DREDGING AND FOR MAJOR FILL AND EXCAVATION PROJECT

AT: Little River Dam Removal and River Restoration Project, Haverhill, MA
Merrimack River Basin Drainage Area

Dear Mr. Fiorentini:

The Department of Environmental Protection ("MassDEP") has reviewed your application for a Combined 401 Water Quality Certification for Minor Dredging and Major Fill and Excavation ("Combined Permit"), as referenced above and is basing its certification upon an evaluation of the information contained in the application which is relevant to water quality considerations. In accordance with the provisions of Section 401 of the Federal Clean Water Act (33 U.S.C. § 1251 *et seq*.), M.G.L. c. 21, §§ 26-53, and 314 CMR 9.00, MassDEP has determined there is reasonable assurance the project or activity, as conditioned herein, will be conducted in a manner which will not violate applicable water quality standards (314 CMR 4.00) and other appropriate requirements of state law.

The waters of the Little River, which is part of the Merrimack River Basin Drainage Area, is designated in the Massachusetts Surface Water Quality Standards as B. These waters are designated as a "habitat for fish, other aquatic life, and wildlife, including for their reproduction, migration, growth and other critical functions, and for primary and secondary contact recreation." Anti-degradation provisions of these Standards require that "existing uses and the level of water quality necessary to protect the existing uses shall be maintained and protected."

The proposed project consists of the removal of Little River Dam, and associated river restoration and recreational improvements located on the Little River in Haverhill, MA. The proposed project is intended to provide ecological and community benefits by allowing the river to revert to a natural unobstructed flow, while increasing climate resilience. The proposed removal of the Little River Dam includes demolition of 65 feet of the 75-foot-long dam, to be removed to a minimum of 2 feet below the proposed channel elevation. In addition to dam removal, site features will be installed to further promote an ecologically diverse habitat appropriate for fish migration and spawning, as well as terrestrial habitat.

A total of approximately 10,680 cubic yards of dredged material is anticipated to be generated from the Little River, with dredged material being managed the following ways: 1) beneficially reused within the existing river channel for creation of a new channel and banks, 2) removed for off-site disposal, 3) allowed to naturally migrate downstream.

Up to 8,000 cubic yard of contaminated sediment is anticipated to be generated and disposed of offsite.[1,2] Sediment from the following areas will not be reused onsite nor released downstream.

- **SED-19 sample area:** lead and PAHs-impacted sediment, landfill disposal, area to be delineated during restoration activities as further discussed in Condition #12
- **Transect #2 sample area:** PCB and PAHs-impacted sediment, disposal options not yet determined, limits as described and in accordance with the documents and plans cited in Condition #4
- **SED-4 sample area:** lead-impacted sediment, landfill disposal, area extending to nearest sample locations
- **Transect #7 sample area,** lead-impacted sediment, landfill disposal, area extending to nearest sample locations

Once removed, the dredged material will be placed at one of the following locations and allowed to dewater; the G&C Concrete Construction, Inc property located at 30 Stevens Street, on the Stevens Street Mill Property, or on City property at the back of Cashman's Field. Once the dredged material is sufficiently dewatered, the material will be transported offsite.

Approximately 2,320 cubic yards of the remaining dredged materials will be beneficially reused onsite as part of the ecological restoration for creation of a new channel and banks, and approximately 360 cubic yards of the remaining excess dredged materials which are not needed for onsite reuse is anticipated to be released and redistributed downstream.

Sediment Chemistry Results: Samples were collected from locations upstream of the project area, from within the project area, and downstream of project area above and below the confluence of the Merrimack River. The sediment sample analytical results were compared Reportable Concentration ("RC") S-1 and RCS-2 criteria of the

1 Letter from Fuss & O'Neill to Kenneth Alepidis of MassDEP, dated July 21, 2023
2 Email correspondence between Matthew Kissane of Fuss & O'Neill with Kenneth Alepidis of MassDEP, dated December 21, 2023.

Massachusetts Contingency Plan ("MCP") and compared to Background Levels of PAHs and Metals in Soil levels included in the 2002 MassDEP Technical Update.

Results of the sediment samples analyzed indicated the presence of polycyclic aromatic hydrocarbon (PAHs), metals, polychlorinated biphenyls (PCBs), and Extractable Hydrocarbons (EPHs) in concentrations above the RCS-1 criteria.

Public Notice: The Combined Permit Application public notice was published in the Eagle Tribune newspaper on Wednesday, April 14, 2022. No comments were received by MassDEP during the 21-day public comment period pursuant to 314 CMR 9.05(3)(e), which ended on May 5, 2023.

Section 61 Findings: Pursuant to M.G.L. Chapter 30, Sections 61 to 62H inclusive [the Massachusetts Environmental Policy Act ("MEPA")], the project, as referenced in the Water Quality Certification Application, #23-WW26-0006-APP, was required to file an Expanded Environmental Notification Form (EENF). The City of Haverhill (the City) filed the EENF for construction of the project under EEA #16601. The EENF was noticed in the Environmental Monitor on September 9, 2022. In the Certificate of the Secretary of Energy and Environmental Affairs on the Expanded Environmental Notification Form, issued on October 18, 2022, the Secretary of Energy and Environmental Affairs (the Secretary) indicated that based on review of the EENF and consultation with Agencies, the Proponent was allowed to submit a Single Environmental Impact Report (SEIR) in lieu of a Draft and Final EIR.

The City subsequently filed the SEIR for construction of the project, which was noticed in the Environmental Monitor on February 24, 2023. In the Certificate of the Secretary of Energy and Environmental Affairs on the Single Environmental Impact Report, issued on April 3, 2023, the Secretary determined that "the SEIR adequately and properly complies with MEPA and its implementing regulations."

Therefore, based on information currently in the record, MassDEP grants a Combined 401 WQC for this project subject to the following conditions to maintain or attain water quality, to minimize any damage to the environment that may result from the project, and to ensure compliance with appropriate provisions of state law. MassDEP certifies that there is reasonable assurance the project or activity, as conditioned herein, will be conducted in a manner which will not violate applicable water quality standards (314 CMR 4.00) and other appropriate requirements of state law.

1. Pursuant to 314 CMR 9.01(3), the Contractor shall take all steps necessary to assure that the proposed activities will be conducted in a manner that will avoid violations of the anti-degradation provisions of the Massachusetts Surface Water Quality Standards that protect all waters, including wetlands (314 CMR 4.00). This condition is necessary to assure that any discharge from the project complies with the Massachusetts Surface Water Quality Standards, as provided in 314 CMR 9.00,

to protect the public health and restore and maintain the chemical, physical, and biological integrity of the water resources of the Commonwealth.

2. Prior to the start of work, or for any portion of the work thereafter, MassDEP shall be notified of any change(s) in the proposed project or plans that may affect waters or wetlands. MassDEP will determine whether the change(s) requires a revision to this Certification. This condition, pursuant to 314 CMR 9.07(1) and 314 CMR 9.09(2), is necessary to protect the public health and restore and maintain the chemical, physical, and biological integrity of the water resources of the Commonwealth.

3. As provided by 314 CMR 9.09(1), dredging and filling in accordance with this Certification may begin following the 21-day appeal period and once all other permits have been received. This condition is necessary to protect the public health and restore and maintain the chemical, physical, and biological integrity of the water resources of the Commonwealth.

4. Pursuant to 314 CMR 9.05(1), all work shall be performed in accordance with the following documents and plans. This condition is necessary as these documents outline how the execution of the project will meet the criteria of 314 CMR 9.07 and thereby protecting water quality and preventing degradation to wetlands and waters.

    - Application for Combined Permit, Accela Application #23-WW26-0006-APP, dated April 11, 2023, with attachments.

    - Plans entitled “Preliminary Design Development Plans, Little River Dam Removal and River Restoration Project, Haverhill, Massachusetts,” consisting of 38 sheets, various scales, dated June 30, 2022, prepared by Fuss & O’Neill.

      MassDEP shall be notified if there are modifications and or deletions of work as specified in the plans. Depending on the nature and the scope of any change, approval by the Department may be required.

    - Letter from Fuss & O’Neill to Kenneth Alepidis of MassDEP, dated July 21, 2023, providing project review question responses and additional project details.

    - Email correspondence between Matthew Kissane of Fuss & O’Neill with Kenneth Alepidis of MassDEP, dated December 21, 2023, providing project review question responses and additional project details.

    - Letter from Forest Schenk of the Massachusetts Division of Marine Fisheries (DMF) to the Haverhill Conservation Commission, dated November 10, 2022, providing project review responses and recommendations.

5. As provided by 314 CMR 9.05(4), the Department shall be notified, attention Kenneth Alepidis (kenneth.alepidis@mass.gov), one week prior to the start of in-water work so that Department staff may inspect the work for compliance with the terms and conditions of this Certification. This condition is necessary to ensure that construction practices are implemented in such a manner as to prevent degradation to wetlands and waters of the Commonwealth.

6. Pursuant to 314 CMR 9.05(4), the applicant and its contractor shall allow agents of the Department to enter the project sites to verify compliance with the conditions of this Certification. This condition is necessary to ensure that construction practices are implemented in such a manner as to prevent degradation to wetlands and waters of the Commonwealth.

7. Pursuant to 314 CMR 9.09(1), the term of the 401 WQC remains in effect for the same duration as the federal permit that requires it. This condition is necessary to ensure that construction practices are implemented in such a manner as to prevent degradation to wetlands and waters of the Commonwealth.

8. Future maintenance dredging is not authorized under this Combined 401 WQC. Pursuant to 314 CMR 9.04(5), the project does not qualify for the routine maintenance exemption. This condition is necessary to ensure that the chemical, physical and biological integrity of wetlands and waters of the Commonwealth are protected.

9. In order to be compatible with the fish passage requirements of this fish run and to further minimize potential adverse effects of the project, the time-of-year (TOY) restrictions for dredging, dewatering and associated activities is summarized below.[3] This condition is necessary to protect water quality by ensuring that the project proponent is using planning and construction practices that will maintain the aquatic resource functions and values.

    - All in-water, silt-producing work shall occur outside of a time of year restriction period of March 1 to June 30 for the purpose of minimizing impacts to diadromous fish resources in the adjacent Merrimack River from sedimentation and turbidity.

    - All in-water work be sequenced to occur during periods of low flow stream conditions in the Little River (i.e. July 1 – October 31).

10. In accordance with 314 CMR 9.07(1) and 314 CMR9.07(3), Best Management Practices (BMPs) such a temporary cofferdam to be installed segregating the work area from the rest of the river, and such as a silt curtain to be deployed downstream

3 Letter from Forest Schenk of the Massachusetts Division of Marine Fisheries (DMF) to the Haverhill Conservation Commission, dated November 10, 2022.

of the proposed work area to minimize turbidity. At a minimum, the silt curtain shall be bottom weighted to minimize the degree of lifting/flailing or billowing and shall be of suitable material /grade appropriate based on the velocity of the current at the site. This condition is necessary to ensure that construction practices are implemented in such a manner as to prevent degradation to wetlands and waters. It is also necessary to minimize turbidity and sediment caused by construction activities, protecting water quality.

11. Best Management Practices (BMPs) shall be deployed to minimize turbidity during temporary cofferdam construction. At a minimum, silt curtain shall be used to control turbidity downstream of the proposed work area. Water quality nearby the construction areas such as turbidity (NTU) shall be monitored during before, during, and after cofferdam construction to ensure that water quality standards are met. Turbidity monitoring data shall be kept on site and available for MassDEP review upon request. This condition is necessary to minimize turbidity and sediment caused by construction activities. It is necessary to ensure that water quality is not degraded, and biology of the waters are not negatively impacted by potential discharges.

12. At the lead and PAH-impacted sediment area characterized by the SED-19 sample, additional sampling and characterization is required to delineate the limits of the impacted sediment. A minimum of two sediment samples shall be collected from in-situ sediment present at the SED-19 area for delineation: one upstream and one downstream of the original SED-19 sample location. Samples shall be collected to the depth of proposed sediment removal, for analysis of PAHs and lead. Additional samples may be collected to further refine the limits of the lead and PAHs-impacted sediment in that area.

    Sampling data including a plan of the sample locations, sampling methods and depths, and laboratory QA/QC data shall be provided to MassDEP, attention Kenneth Alepidis (kenneth.alepidis@mass.gov) within 48 hours once available from the analytical laboratory, for review. Results of the chemical analysis shall be compared to the reuse levels in Policy COMM-97-001- Reuse and Disposal of Contaminated Soil at Massachusetts Landfills for reuse as landfill daily cover and to the MCP RCS-1 criteria. MassDEP will review the data to determine limits of the lead and PAH-impacted sediment area at the SED-19 location which will require offsite disposal. Under no circumstances shall the SED-19 sample area material be dredged or transported until MassDEP has reviewed and approved the data and the disposal plan.

13. In accordance with 314 CMR 9.07(1), during dredging and filling operations, measures shall be made to avoid the potential spread of aquatic invasive species to other waterbodies. Appropriate invasive species decontamination protocols shall be reviewed and applied, as required. All vehicles, equipment and tools that have direct contact with invasive species shall be cleaned before leaving the project areas. Under no circumstances shall sediment with invasive species seeds or rhizomes be

reused or transported. This condition is necessary to prevent the spread or introduction of invasive species which would affect water quality and biological resources. It is necessary to sustain aquatic resource functions, as well as characteristics and health of the waters.

14. If invasive species along part of the project areas are found, they shall be removed and shall be replaced with native herbaceous and shrub vegetation. During replanting, precautions will be taken to minimize the introduction of invasive species, including requiring the use of certified clean, weed-free soils, and equipment to reduce the risk of introducing non-native invasive species at site. This condition is necessary to prevent the spread or introduction of invasive species which would affect water quality and biological resources. It is necessary to sustain aquatic resource functions, as well as characteristics and health of the waters.

15. In accordance with 314 CMR 9.06(6)(a)8., the Applicant shall utilize stabilized construction entrances, vehicle wash down pads, perimeter erosion controls, and re-vegetation of disturbed areas with native plantings and seed mixes in accordance with project plans to minimize potential water quality impact resulting from construction activities. This condition is necessary to ensure that construction practices are implemented in such a manner as to prevent degradation to wetlands and waters. It is also necessary to ensure that impacts to wetlands and waters are appropriately mitigated.

16. Best Management Practices shall be employed by the Contractor to protect resource areas located adjacent to the proposed staging/temporary dredged material stockpiling and dewatering areas. Sediment stockpiles shall be constructed in accordance with the MassDEP approved project plans, stabilized, bottom-lined and securely covered with wind tear resistance tarpaulin, polyethylene sheeting or similar impermeable material at all times, and properly labeled. Stockpile covers shall be securely weighed down. Stockpiles shall also be secured to restrict access by the public and shall be set back at least 10-feet from temporary construction access roads or other areas and activities which could disturb the stockpiles and associated erosion controls. Inspection of the sediment containment and dewatering location and associated erosion controls shall be conducted daily and more frequently immediately before, during and after all precipitation and storm events. Any observed deficiency shall be corrected or repaired in a timely manner.

17. Pursuant to 314 CMR 9.09(1), in case of a precipitation or storm event, the site shall be secured beforehand in such a way as to protect resource areas and waters on site and downstream of the site, including covering of stockpiles of dredged material; inspection of erosion and sedimentation controls and correction as needed; and removal of any debris, equipment, materials, etc. that could potentially enter the waters on-site. Sediment stockpile areas shall be inspected immediately prior to, during and immediately after all precipitation and storm events. Any observed deficiency shall be corrected or repaired in a timely manner to prevent discharge

from the stockpiled material. If stormwater runoff and erosion is observed from stockpiled dredged material, additional erosion and/or damage prevention controls measures shall be implemented. This condition is necessary to minimize stormwater runoff and erosion from impacting wetland resources.

18. Dredging, stockpiling of dredged material, and offsite transport of dredged material shall be sequenced and conducted in a manner to limit stockpiling time. Sediment characterized as having concentrations exceeding the RCS-1 criteria shall not be stockpiled at the site longer than 90-days from the date of generation.

19. All sedimentation barriers shall be maintained in good repair until all disturbed areas have been fully stabilized with vegetation or other means. At no time shall sediments be deposited in a wetland or water body, except as described in the documents and plans cited in Condition # 4. During construction, the applicant or his/her designee shall inspect the erosion controls on a daily basis and shall remove accumulated sediments as needed. The applicant shall immediately control any erosion problems that occur at the site and shall also immediately notify MassDEP, which reserves the right to require additional erosion and/or damage prevention controls it may deem necessary. Sedimentation barriers shall serve as the limit of work unless another limit of work line has been approved by MassDEP pursuant to this 401 WQC. Pursuant to 314 CMR 9.06(6)(a)8., this condition is necessary to avoid and minimize adverse construction impacts to wetlands and waters of the Commonwealth.

20. In accordance with 314 CMR 9.07(1), no later than 21 days prior to commencement of dredging activity, a dredged material dewatering plan shall be submitted to MassDEP for review and approval. At a minimum, the dewatering plan shall include but not be limited to the type of containment, method of dewatering (i.e. mechanical or by gravity), method of collecting the dewatered effluent and method of disposal.

21. No later than 21 days prior to commencement of dredging activity, a construction phase water control plan shall be submitted to MassDEP for review and written approval if it differs from the proposed plan referenced in Condition # 4. Pursuant to 314 CMR 9.06(1)(c)4.c. and 9.07(1)(b)4.c., this condition is necessary to avoid and minimize adverse construction impacts to wetlands and waters of the Commonwealth.

22. Flow to the downstream channel shall be maintained throughout construction of the project via cofferdam construction and phased approach as described in and in accordance with the documents and plans cited in Condition # 4. As provided by 314 CMR 9.09(1), this condition is necessary to protect the public health and restore and maintain the chemical, physical, and biological integrity of the water resources of the Commonwealth. Pursuant to 314 CMR 9.07(1)(c), this condition is necessary to ensure that construction will be conducted in a manner that will not reduce or alter the habitat functions of the affected wetlands and waters of the Commonwealth.

23. Any approved discharge of water shall be controlled so that no scouring shall occur. This condition is necessary to adequately minimize and contain runoff water and material from the dredged material dewatering process to protect the waters. It is also necessary to ensure that water quality is not degraded, and biological resources are not negatively impacted by potential discharges.

24. The wetland restoration areas shall be constructed and monitored as described in and in accordance with the documents and plans cited in Condition # 4. Pursuant to 314 CMR 9.06(2)(a), this condition is necessary to ensure that wetlands of the Commonwealth are restored.

25. All sediment management activities authorized by this Combined 401 WQC shall be conducted under the supervision of a Licensed Site Professional ("LSP"). Pursuant to 314 CMR 9.02, this condition is necessary to ensure that the management of the contaminated sediment is overseen by a Qualified Environmental Professional.

26. A Health & Safety Plan shall be required for handling of sediment which has been characterized as exceeding MCP RCS-1 criteria. A copy shall be provided to the Department within six weeks of the effective of this Certification or two weeks prior to the commencement of the dredging operation whichever comes first.

27. Pursuant to 314 CMR 9.07(1), 314CMR9.07(5), 9.07(9), and 314 CMR 9.07(13)(b), MassDEP shall be notified in writing of the name and location of the upland licensed facilities accepting the dredged material for disposal or reuse for review and approval. If the licensed facility is located out of state, documentation shall be provided to MassDEP that the dredged material disposal/reuse has been approved and will be accepted by the receiving State in accordance with 314 CMR 9.07(13)(b). The dredged material shall not be transported to the facility without concurrence of MassDEP.

28. Transportation and disposal of the dredged material shall be overseen by the LSP of record. In accordance with 314 CMR 9.07(5), a Bills-of-Lading (BOL) or a Material Shipping Record (MSR) shall be used to track the dredged material to the proposed intermediate (stockpiling /dewatering) facility. A fully executed copy of the BOL or MSR shall be provided to MassDEP within 30 days of final shipment to the reused location or facility. Pursuant to 314 CMR 9.07(5), this condition is necessary to maintain a record of the dredged material for reference and to ensure accountability in its transportation. This assists in the protection of health, safety, public welfare, and the environment from any potential hazards during transportation. This condition is necessary to maintain a record of the dredged material for to ensure that dredge material disposal will not adversely affect any wetlands or waters.

29. In accordance with 314 CMR 9.07(5), Best Management Practices (BMPs) shall be implemented during transportation of the dredged material to the licensed receiving facility. At a minimum, when transported upon public roadways, all dredged material

shall have no free liquid as determined by the Paint Filter Test or other suitably analogous methodology acceptable to MassDEP, and a tarpaulin or other means shall be used to cover the dredged material during transport. This condition is necessary to protect surrounding area water quality during transportation. These practices help to avoid fugitive dust and siltation into wetland resources and waters.

30. Pursuant to 314 CMR 9.06, disposal of any volume of dredged material at any location in tidal waters, other than as approved herein, is not authorized by this 401 Water Quality Certification, and would require a request for amendment that would be subject to approval by MassDEP and the Massachusetts Coastal Zone Management office. This condition is necessary to prevent any pollution of tidal water resources by discharge of dredged material.

31. All equipment/machinery shall be stored outside above the High Water Mark ("HWM") and any wetland resource areas when not in use. Pursuant to 314 CMR 9.06(6)(a)8. this condition is necessary to avoid and minimize adverse construction impacts to wetlands and waters of the Commonwealth.

32. Pursuant to 314 CMR 9.06(6)(a)8., storing, servicing, or cleaning of equipment, including but not limited to fueling, changing, adding, or applying lubricants or hydraulic fluids, or washing/rinsing of trucks or equipment, shall be performed outside wetland resource areas. This condition ensures that no hazardous materials from equipment are inadvertently discharged into the water resource area in which construction is occurring, which would otherwise degrade water quality.

33. Pursuant to 314 CMR 9.06(6)(a)8. during the project period, there shall be no discharge or spillage of fuel, oil, or other pollutants, including sediments, onto any part of the site. The applicant shall take all reasonable precautions to prevent the release of pollutants by ignorance, accident, or vandalism. This condition is necessary to ensure that construction practices are implemented in such a manner as to prevent degradation to wetlands and waters.

34. In accordance with 314 CMR 9.09(1) and 314 CMR 9.06(6)(a)8., no later than four weeks after issuance of this water quality certification, the applicant shall submit a notification procedure outlining the reporting process to MassDEP for incidents relating to dredging activities that impact surrounding resource areas and habitats including, but not limited to, observed dead or distressed fish or other aquatic organisms, observed oily sheen on the surface of the water, a sediment spill, a turbidity plume beyond the deployed BMPs, and a barge or equipment accident/spill. If at any time during implementation of the project such an incident occurs, the applicant shall immediately notify MassDEP and all site related activities impacting the water shall cease until the source of the problem is identified and adequate mitigating measures are deployed to the satisfaction of MassDEP. This condition is necessary to protect water quality because it ensures that the project proponent is

using proper monitoring and construction practices that will maintain the integrity of the site hydrology and maintain the aquatic resource functions and values.

35. Upon completion of the project, remnants of project debris such as dewatering structures, cofferdams, turbidity curtains, coir logs, coir matting, sediment control barrier components, sediment traps, etc. shall be removed and disposed of appropriately at an offsite facility. This condition is necessary to prevent degradation to wetlands and waters.

36. Pursuant to 314 CMR 9.07(1) within 30 days of completion of the dredging at Little River Dam Removal and River Restoration Project in Haverhill, the applicant shall provide a set of construction photographs depicting pre-, during, and post-dredging and filling activities to the Wetlands Program in the Boston Office, Attn: Kenneth Alepidis. The photographs shall be marked or labeled with the WQC transmittal number and wetlands file number of the project. This condition is necessary to ensure that water quality requirements are met. It is necessary to ensure the project proponent uses planning and construction practices that maintain the integrity of the site hydrology and maintain the aquatic resource functions and values.

Failure to comply with this Combined 401 WQC is grounds for enforcement, including civil and criminal penalties, under M.G.L. c. 21, § 42, 314 CMR 9.00, M.G.L. c. 21A, § 16, 310 CMR 5.00, or other possible actions/penalties as authorized by the General Laws of the Commonwealth.

This Combined 401 WQC does not relieve the applicant of the obligation to comply with other appropriate state or federal statutes or regulations. Any changes made to the project as described in the previously submitted Combined Permit Application or supplemental documents will require further notification to and, if an amendment is required, approval by MassDEP.

NOTICE OF APPEAL RIGHTS

Certain persons shall have a right to request an adjudicatory hearing concerning 401 WQCs by MassDEP when an application is required:

a. the applicant or property owner;
b. any person aggrieved by the decision who has submitted written comments during the public comment period;
c. any ten persons of the Commonwealth pursuant to M.G.L. c. 30A where a group member has submitted written comments during the public comment period; or
d. any governmental body or private organization with a mandate to protect the environment, which has submitted written comments during the public comment period.

Any person aggrieved, any ten (10) persons of the Commonwealth, or a governmental body or private organization with a mandate to protect the environment may appeal without having submitted written comments during the public comment period only when the claim is based on new substantive issues arising from material changes to the scope or impact of the activity and not apparent at the time of public notice. To request an adjudicatory hearing pursuant to M.G.L. c. 30A, § 10, a Notice of Claim must be made in writing, provided that the request is made by certified mail or hand delivery to MassDEP, with the appropriate filing fee specified within 310 CMR 4.10 along with a DEP Fee Transmittal Form within twenty-one 21 days from the date of issuance of this Certificate.

Case Administrator
Massachusetts Department of Environmental Protection
Office of Appeals and Dispute Resolution
100 Cambridge Street, Suite 900
Boston, MA 02114

A copy of the request shall at the same time be sent by certified mail or hand delivery to the issuing office of the Wetlands Program at:

Department of Environmental Protection
100 Cambridge Street, Suite 900
Boston, MA 02114

A Notice of Claim for Adjudicatory Hearing shall comply with MassDEP's Rules for Adjudicatory Proceedings, 310 CMR 1.01(6), and shall contain the following information pursuant to 314 CMR 9.10(3):

a. the Combined Permit Authorization Number;
b. the complete name of the applicant and address of the project;
c. the complete name, address, and fax and telephone numbers of the party filing the request, and, if represented by counsel or other representative, the name, fax and telephone numbers, and address of the attorney;
d. if claiming to be a party aggrieved, the specific facts that demonstrate that the party satisfies the definition of "aggrieved person" found at 314 CMR 9.02;
e. a clear and concise statement that an adjudicatory hearing is being requested;
f. a clear and concise statement of (1) the facts which are grounds for the proceedings, (2) the objections to this Certificate, including specifically the manner in which it is alleged to be inconsistent with the MassDEP's Water Quality Regulations, 314 CMR 9.00, and (3) the relief sought through the adjudicatory hearing, including specifically the changes desired in the final written 401 WQC; and
g. a statement that a copy of the request has been sent by certified mail or hand delivery to the applicant, the owner (if different from the applicant), the conservation commission of the city or town where the activity will occur, the

Department of Conservation and Recreation (when the certificate concerns projects in Areas of Critical Environmental Concern), the public or private water supplier where the project is located (when the certificate concerns projects in Outstanding Resource Waters), and any other entity with responsibility for the resource where the project is located.

The hearing request along with a DEP Fee Transmittal Form and a valid check or money order payable to the Commonwealth of Massachusetts in the amount of one hundred dollars ($100) must be mailed to:

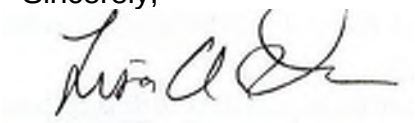
Commonwealth of Massachusetts
Department of Environmental Protection
Commonwealth Master Lockbox
PO Box 4062
Boston, MA 02211

The request will be dismissed if the filing fee is not paid, unless the appellant is exempt or granted a waiver. The filing fee is not required if the appellant is a city or town (or municipal agency), county, or district of the Commonwealth of Massachusetts, or a municipal housing authority. MassDEP may waive the adjudicatory hearing filing fee pursuant to 310 CMR 4.06(2) for a person who shows that paying the fee will create an undue financial hardship. A person seeking a waiver must file an affidavit setting forth the facts believed to support the claim of undue financial hardship together with the hearing request as provided above.

Failure to comply with this certification is grounds for enforcement, including civil and criminal penalties, under MGL c.21 §42, 314 CMR 9.00, MGL c. 21A §16, 310 CMR 5.00, or other possible actions/penalties as authorized by the General Laws of the Commonwealth.

Should you have any questions relative to this Combined 401 WQC, please contact Kenneth Alepidis at kenneth.alepidis@mass.gov.

Sincerely,



Lisa Rhodes
Wetlands Program Chief

MAP NOTES AND REFERENCES

1. REFERENCES:
   A. COMMONWEALTH OF MASSACHUSETTS DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATIONS FOR HIGHWAY AND BRIDGES, 2022 EDITION, REVISIONS AND ALL CURRENT ADDENDA, ARE MADE A PART HEREOF, AS IF ATTACHED HERETO. ALL REFERENCES TO "STATE STANDARD SPECIFICATIONS" SHALL REFER TO THE LATEST EDITION OF THE COMMONWEALTH OF MASSACHUSETTS DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATIONS FOR HIGHWAYS AND BRIDGES CONSTRUCTION.
   B. THE MASSACHUSETTS DEPARTMENT OF TRANSPORTATION CONSTRUCTION STANDARD DETAILS, 2017 EDITION, AND ALL CURRENT REVISIONS, ARE MADE A PART HEREOF, AS IF ATTACHED HERETO.
   C. THE MASSACHUSETTS EROSION AND SEDIMENT CONTROL GUIDELINES FOR URBAN AND SUBURBAN AREAS, 2013 EDITION, REVISIONS AND ALL CURRENT ADDENDA, ARE MADE A PART HEREOF, AS IF ATTACHED HERETO. ALL REFERENCES TO "SOIL EROSION AND SEDIMENT CONTROL HANDBOOK" SHALL REFER TO THE LATEST EDITION OF THE MASSACHUSETTS EROSION AND SEDIMENT CONTROL GUIDELINES FOR URBAN AND SUBURBAN AREAS.

2. EXISTING CONDITIONS:
   A. SURVEY: CONTOURS SHOWN ON THIS PLAN THAT ARE OUTSIDE OF THE RIVER AND CASHMAN PARK AREA ARE APPROXIMATE ONLY AND WERE OBTAINED FROM 2013-2014 USGS LIDAR DATA OBTAINED FROM NOAA'S ONLINE DATA ACCESS VIEWER. TOPOGRAPHY WITHIN CASHMAN PARK, BATHYMETRIC SPOT ELEVATIONS (WITHIN THE RIVER), AND SEDIMENT DEPTHS (WITHIN THE RIVER) WERE OBTAINED FROM THE FOLLOWING COMBINATION OF FIELD INVESTIGATIONS AND RESEARCH:
      A.A. ELEVATIONS SHOWN WITHIN RIVER WITH ASTERISKS ARE APPROXIMATE AND WERE OBTAINED ON NOVEMBER 6, 2020 AND ON NOVEMBER 17, 2020 FROM DEPTH MEASUREMENTS TAKEN BY BOAT BY FUSS & O'NEILL AND TG&B MARINE SERVICES, INC.
      A.B. ELEVATIONS IN RIVER AND AT WINTER STREET THAT DO NOT INCLUDE ASTERISKS WERE OBTAINED FROM ACTUAL FIELD SURVEY PERFORMED BY FUSS & O'NEILL IN FALL OF 2021 AND WINTER OF 2022. ELEVATION WITH "I" DESIGNATION REFERS TO TOP OF SEDIMENT ELEVATION; ELEVATION WITH "B" DESIGNATION REFERS TO BOTTOM OF SEDIMENT. ELEVATIONS THAT DO NOT HAVE ASTERISKS OR "I" OR "B" DESIGNATION WERE ALSO OBTAINED FROM ACTUAL FIELD SURVEY.
      A.C. ELEVATION AND WETLANDS DATA WITHIN CASHMAN PARK WAS OBTAINED FROM AN EXISTING CONDITIONS SURVEY PLAN OF CASHMAN PARK, DATED JUNE 1, 2017, AND PREPARED BY SMC SURVEYING AND MAPPING CONSULTANTS.
   B. TOPOGRAPHIC INFORMATION (CONTOURS), BUILDING FOOTPRINTS, EXISTING FEATURES SHOWN OUTSIDE OF THE PROJECT'S RIGHTS OF WAY ARE APPROXIMATE ONLY AND WERE OBTAINED FROM A COMBINATION OF 2013-2014 USGS CMGP LIDAR DATA (OBTAINED FROM NOAA'S ONLINE DATA ACCESS VIEWER) AND MASSGIS DATA LAYER.
   C. WETLAND FLAGGING ALONG LITTLE RIVER WITHIN THE DIRECT PROJECT LIMITS WAS PERFORMED BY FUSS & O'NEILL, INC. (MICHAEL SOARES, WETLAND SCIENTIST) ON SEPTEMBER 27, 2021 AND APRIL 29, 2022. THE WETLAND FLAGS WERE THEN LOCATED VIA SUB-METER GPS. DUE TO SPECIFIC SITE RESTRICTIONS OR SAFETY CONCERNS, IT WAS NOT POSSIBLE TO ACCESS AND FIELD-DELINEATE SOME SEGMENTS OF RIVERBANK AND BORDERING WETLANDS. IN LOCATIONS WHERE A TYPICAL FIELD DELINEATION OF THE BANK, LUWW, AND/OR BVW WAS NOT PRACTICABLE, BOUNDARIES OF RESOURCE AREAS BETWEEN FIELD DELINEATED SEGMENTS WERE COMPLETED IN GIS THROUGH A REVIEW OF AERIAL IMAGERY (2014-2021, SPRING AND SUMMER), FEDERAL AND STATE WETLANDS MAPPING (NATIONAL WETLANDS INVENTORY AND MASS DEP, RESPECTIVELY), AND 1-FOOT CONTOURS (DERIVED FROM 2013-2014 LIDAR). STATE-REGULATED RIVERFRONT AREA IS MEASURED HORIZONTALLY FROM BANK OF LITTLE RIVER, AND STATE-REGULATED BUFFER ZONE IS MEASURED HORIZONTALLY FROM THE BOUNDARIES OF BVW IDENTIFIED AT THE SITE.
   D. ASSESSOR'S PARCELS, WETLAND BOUNDARIES (UPSTREAM OF THE MBTA BRIDGE AND THE PROJECT'S LIMIT OF DIRECT IMPACTS), POTENTIAL & CERTIFIED VERNAL POOLS, SHOWN ON THESE PLANS ARE APPROXIMATE AND WERE OBTAINED FROM MASSACHUSETTS GEOGRAPHIC INFORMATION SYSTEM (MASSGIS).

3. FLOOD ZONE:
   A. SPECIAL FLOOD HAZARD AREAS (SFHAS), INCLUDING FLOODWAY INFORMATION, SHOWN ON THIS PLAN WERE INITIALLY OBTAINED FROM FEMA FLOOD INSURANCE RATE MAP (FIRM) PANEL NUMBER 25009C0089G WITH AN EFFECTIVE DATE OF JULY 19, 2018 AND FIRM PANEL NUMBERS 25009C0087F, 25009C0086F, AND 25009C0078F WITH AN EFFECTIVE DATE OF JULY 3, 2012 FOR ESSEX COUNTY, MASSACHUSETTS. THESE FLOOD HAZARD AREAS WERE THEN MODIFIED BASED ON THE RESULTS OF MORE DETAILED TOPOGRAPHY AND A PRE-CONDITIONS (OR PRE-DAM REMOVAL) HYDRAULIC ANALYSIS PERFORMED BY FUSS & O'NEILL USING HEC-RAS. IN ORDER TO ASSESS ANTICIPATED HYDRAULIC IMPACTS AS A RESULT OF THE PROPOSED REMOVAL OF THE DAM, A POST-CONDITIONS (OR POST-DAM REMOVAL) HYDRAULIC ANALYSIS WAS ALSO PERFORMED BY FUSS & O'NEILL USING HEC-RAS. THE MODIFIED PRE-CONDITIONS SPECIAL FLOOD AREA BOUNDARIES ARE REFLECTED ON THE EXISTING CONDITIONS PLANS. THE POST-CONDITIONS (OR POST-DAM REMOVAL) SPECIAL FLOOD AREA BOUNDARIES ARE REFLECTED ON THE SITE LAYOUT AND GRADING PLANS.

4. NATURAL HERITAGE DATA:
   THERE ARE NO NHESP PRIORITY HABITATS OF RARE SPECIES, ESTIMATED HABITATS OF RARE WILDLIFE, OR NATURAL COMMUNITIES LOCATED ALONG THE LITTLE RIVER. THERE ARE ALSO NO AREAS OF CRITICAL ENVIRONMENTAL CONCERN ALONG LITTLE RIVER. THERE ONE, HOWEVER, POTENTIAL VERNAL POOLS LOCATED ALONG LITTLE RIVER TO THE SOUTH OF THE RIVER'S CROSSING WITH I-495 AND NORTH OF THE RIVER'S RAILROAD BRIDGE CROSSING. THESE POTENTIAL VERNAL POOLS WERE OBTAINED FROM MASSGIS.

5. UTILITIES:
   UTILITIES SHOWN ON THIS PLAN WERE APPROXIMATED FROM FIELD OBSERVATIONS AND A COLLECTIVE REVIEW OF THE FOLLOWING DOCUMENTS: (1) WINTER STREET AND HALE STREET SEWER DIVERSION PLAN PREPARED BY METCALF & EDDY (DATED JULY 1937), (2) FLOOD PROTECTION SYSTEM IMPROVEMENT PLANS (CWSRF-3862, IFB020-13) PREPARED BY AECOM (DATED JANUARY 14, 2013), AND (3) INTERSTATE FINAL CONTRACTOR SEWER OVERFLOW LONG-TERM CONTROL PLAN AND SUPPLEMENTAL ENVIRONMENTAL IMPACT REPORT PREPARED BY CDM SMITH (DATED FEBRUARY 2017).

6. ACTIVITY AND USE LIMITATION AREAS AND UNDERGROUND STORAGE TANKS:
   ALL PROPERTIES WHERE WORK IS PROPOSED DO NOT HAVE UNDERGROUND STORAGE TANKS. HOWEVER, PARCEL 518-304-1 (93 LAFAYETTE SQUARE) IS CONSIDERED AN AUL (ACTIVITY AND USE LIMITATION) PROPERTY.

GENERAL CONSTRUCTION AND COORDINATION REQUIREMENTS

1. THE CONTRACTOR SHALL VERIFY THE LOCATION OF THE EXISTING DAM TO BE REMOVED, EXISTING ADJACENT STRUCTURES, AND THE PROPOSED LAYOUT OF THE RIVER CHANNEL IMPROVEMENTS WITH ITS RELATIONSHIP TO THE EXISTING SITE SURVEY. THE CONTRACTOR SHALL ALSO VERIFY ALL DIMENSIONS, SITE CONDITIONS, AND MATERIAL SPECIFICATIONS AND SHALL NOTIFY THE OWNER AND ENGINEER OF ANY ERRORS, OMISSIONS OR DISCREPANCIES BEFORE COMMENCING OR PROCEEDING WITH WORK.
2. THE CONTRACTOR SHALL TAKE FIELD MEASUREMENTS AS REQUIRED TO FIT THE WORK PROPERLY. RECHECK MEASUREMENTS BEFORE CONSTRUCTING EACH WORK ITEM. WHERE PORTIONS OF THE WORK ARE INDICATED TO FIT TO OTHER CONSTRUCTION, VERIFY DIMENSIONS OF OTHER CONSTRUCTION BY FIELD MEASUREMENTS BEFORE FABRICATION. COORDINATE FABRICATION SCHEDULE WITH CONSTRUCTION PROGRESS TO AVOID DELAYING THE WORK.
3. THE LOCATION OF EXISTING UTILITIES ARE APPROXIMATE, HAVE BEEN PLOTTED FROM THE LATEST AVAILABLE INFORMATION, AND MAY NOT BE ALL INCLUSIVE. THE CONTRACTOR SHALL CHECK AND VERIFY THE LOCATIONS OF ALL EXISTING UTILITIES, BOTH OVERHEAD AND UNDERGROUND, AND "DIG-SAFE" MUST BE NOTIFIED PRIOR TO COMMENCING ANY CONSTRUCTION OPERATIONS. RESTORATION AND REPAIR OF DAMAGE TO EXISTING UTILITIES SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR WITH NO ADDITIONAL COST TO THE OWNER. NO EXCAVATION SHALL COMMENCE UNTIL ALL INVOLVED UTILITY COMPANIES AND/OR TOWN WHOSE FACILITIES MIGHT BE AFFECTED BY ANY WORK TO BE PERFORMED BY THE CONTRACTOR ARE NOTIFIED AT LEAST 72 HOURS IN ADVANCE. RELOCATION OF ANY UTILITIES SHALL BE AT THE OWNERS EXPENSE AND COMPLETED WITH THE UTILITY WORK. THE OWNER SHALL BE NOTIFIED AS TO THE RELOCATIONS REQUIRED PRIOR TO THE START OF CONSTRUCTION.
4. DEVIATIONS OR CHANGES FROM THESE PLANS WILL NOT BE ALLOWED UNLESS APPROVED BY THE ENGINEER/CONTRACT OWNER.
5. THE CONTRACTOR SHALL MAKE EXPLORATORY EXCAVATIONS AND LOCATE ANY EXISTING UTILITIES SUFFICIENTLY AHEAD OF CONSTRUCTION TO PERMIT REVISIONS TO PLANS IF NECESSARY. HOWEVER, EXPLORATORY EXCAVATIONS AND OTHER ACTIVITIES INVOLVING SOIL DISTURBANCES WITHIN THE RIVER OR OTHER ADJACENT WATERCOURSES SHALL BE LIMITED TO THE LOW-FLOW PERIOD (I.E. THE PERIOD FROM JULY 1 TO OCTOBER 31 OF ANY CALENDAR YEAR).
6. THE EXISTENCE AND/OR LOCATION OF UTILITIES SHOWN ON THESE PLANS MAY BE ONLY APPROXIMATELY CORRECT AND THE CONTRACTOR IS REQUIRED TO TAKE PRECAUTIONARY MEASURES TO PROTECT THE UTILITIES SHOWN HEREON AND ANY OTHER EXISTING UTILITIES NOT OF RECORD OR NOT SHOWN ON THESE PLANS. THE CONTRACTOR SHALL BE RESPONSIBLE FOR REMOVING, AT HIS/HER EXPENSE, ANY EXISTING UTILITIES DAMAGED DURING CONSTRUCTION.
7. THE CONTRACTOR SHALL BE RESPONSIBLE FOR REPLACING, WITH MATCHING MATERIALS, ANY PAVEMENT, WALKS, CURBS, WALLS, FENCES, ETC., THAT MUST BE CUT OR THAT ARE DAMAGED DURING CONSTRUCTION.
8. THE CONTRACTOR SHALL BE RESPONSIBLE FOR OBTAINING ALL REMAINING NECESSARY PERMITS, INSPECTIONS, BONDS, ETC. AND OTHER APPROVAL RELATED ITEMS WITH THE LOCAL AND STATE/FEDERAL MUNICIPALITIES. NO CONSTRUCTION SHALL COMMENCE UNTIL SUCH PERMITS HAVE BEEN SECURED AND THE CONTRACTOR HAS RECEIVED THE REQUIRED NOTICES.
9. WORK ON MBTA PROPERTY CAN ONLY BE UNDERTAKEN UPON RECEIPT OF A LICENSE FROM MBTA.
10. AN APPROVED SET OF PLANS AND ALL APPLICABLE PERMITS MUST BE AVAILABLE AT THE SITE THROUGH THE ENTIRE PERIOD OF CONSTRUCTION WHEN WORK IS ACTIVELY OCCURING.
11. CONTRACTOR AGREES THAT HE/SHE SHALL ASSUME SOLE AND COMPLETE RESPONSIBILITY FOR JOB SITE CONDITIONS DURING THE COURSE OF CONSTRUCTION OF THIS PROJECT, INCLUDING SAFETY OF ALL PERSONS AND PROPERTY; THAT THIS REQUIREMENT SHALL APPLY CONTINUOUSLY AND NOT BE LIMITED TO NORMAL WORKING HOURS; AND THAT THE CONTRACTOR SHALL DEFEND, INDEMNIFY AND HOLD THE CONTRACT OWNER (CITY OF HAVERHILL), PROPERTY OWNERS AND THE ENGINEER HARMLESS FROM ANY AND ALL LIABILITY, REAL AND ALLEGED, IN CONNECTION WITH THE PERFORMANCE OF WORK ON THIS PROJECT, EXCEPTING FOR LIABILITY ARISING FROM "THE SOLE NEGLIGENCE OF THE CONTRACT OWNER, PROPERTY OWNER OR THE ENGINEER."
12. PHOTOGRAPHS, VIDEOTAPING, AND SKETCHES (AS NECESSARY) MUST BE TAKEN OF ADJOINING CONSTRUCTION AND SITE IMPROVEMENTS WITHIN 200 FEET OF EXCAVATION LIMITS ASSOCIATED WITH THE DAM REMOVAL AND RIVER CHANNEL IMPROVEMENTS PRIOR TO EXCAVATION AND THE INSTALLATION OF EXCAVATION SUPPORT SYSTEMS. SUCH DOCUMENTATION SHALL ILLUSTRATE EXISTING SURFACES THAT MAY BE MISCONSTRUED AS DAMAGE CAUSED BY THIS PROJECT CONSTRUCTION OPERATIONS.
13. METHODS AND MATERIALS USED IN THE CONSTRUCTION OF IMPROVEMENTS FOR THIS PROJECT SHALL CONFORM TO THE CURRENT CONSTRUCTION STANDARDS AND SPECIFICATIONS OF THE CITY OF HAVERHILL AND THE MASSACHUSETTS DEPARTMENT OF TRANSPORTATION.
14. VERIFY SPACE REQUIREMENTS AND DIMENSIONS OF ITEMS SHOWN ON DRAWINGS. CHECK THE LOCATION, LEVEL AND GRADE, OF EVERY MAJOR ELEMENT AS THE WORK PROGRESSES.
15. ESTABLISH BENCHMARKS AND CONTROL POINTS IN ADDITION TO THOSE INDICATED TO SET LINES, GRADES, AND LEVELS AT EACH STAGE OF CONSTRUCTION. LOCATE THE WORK AND COMPONENTS OF THE WORK ACCURATELY, IN CORRECT ALIGNMENT AND ELEVATION, AS INDICATED BOUNDS OR MONUMENTATION DISTURBED DURING CONSTRUCTION SHALL BE SET OR RESET BY A PROFESSIONAL LICENSED SURVEYOR AT NO COST TO THE OWNER.
16. COMPLY WITH MANUFACTURERS' WRITTEN INSTRUCTIONS AND RECOMMENDATIONS FOR INSTALLING MATERIALS AND PRODUCTS. INSTALL PRODUCTS AT THE TIME AND UNDER CONDITIONS THAT WILL ENSURE THE BEST POSSIBLE RESULTS. MAINTAIN CONDITIONS REQUIRED FOR PRODUCT PERFORMANCE UNTIL SUBSTANTIAL COMPLETION.
17. USE PRODUCTS, CLEANERS, AND INSTALLATION MATERIALS THAT ARE NOT CONSIDERED HAZARDOUS.
18. CONTRACTOR SHALL IDENTIFY TREES TO BE REMOVED PRIOR TO CONSTRUCTION AND MARK THEM WITH CONSTRUCTION TAPE FOR REVIEW BY THE OWNER/ENGINEER. TREES AND OTHER EXISTING VEGETATION SHALL BE RETAINED WHEREVER FEASIBLE. CONTRACTOR SHALL NOT REMOVE TREES UNTIL REVIEWED AND APPROVED BY THE OWNER/ENGINEER.
19. THE CONTRACTOR SHALL RESTORE DISTURBED LANDSCAPE AREAS TO ORIGINAL CONDITION (I.E. SEEDED, SODDED, PLANTED), UNLESS OTHERWISE DIRECTED WITHIN CONTRACT DOCUMENTS.
20. ALL EXCESS EXCAVATED MATERIALS, EXCESS FILL, EXCESS CONSTRUCTION MATERIALS, DEBRIS, AND WASTE (INCLUDING IDENTIFIED CONTAMINATED SOILS WITHIN RIVER) SHALL BE REMOVED FROM THE SITE AND SHALL BE DISPOSED OF IN ACCORDANCE WITH APPLICABLE LAWS.
21. DO NOT CLOSE OR OBSTRUCT ROADWAYS, SIDEWALKS, FIRE HYDRANTS, AND UTILITIES WITHOUT APPROPRIATE PERMITS.
22. WORK IS RESTRICTED TO THE HOURS OF 7 AM TO 5 PM ON MONDAY THROUGH FRIDAY, EXCLUDING HOLIDAYS, UNLESS OTHERWISE APPROVED BY THE OWNER.
23. PRIOR TO CONSTRUCTION, ADDITIONAL CONSTRUCTION ACCESSES AND/OR CONSTRUCTION EASEMENTS NOT SHOWN ON THIS PLAN (AGREED UPON THROUGH COORDINATION BETWEEN CONTRACTOR AND PROPERTY OWNER) MUST BE GRANTED IN WRITING BY PROPERTY OWNERS.
24. STOP WORK IN THE VICINITY OF SUSPECTED CONTAMINATED SOIL, GROUNDWATER, OR OTHER MEDIA OUTSIDE OF THE AREA OF CONTAMINATED SOIL AREA IDENTIFIED WITHIN. IMMEDIATELY NOTIFY THE ENGINEER AND OWNER SO THAT APPROPRIATE TESTING AND SUBSEQUENT ACTION CAN BE TAKEN. RESUME WORK IN THE IMMEDIATE VICINITY ONLY UPON DIRECTION BY THE OWNER.

PROTECTION OF WORK REQUIREMENTS

1. THE WORK AND SITE SHALL BE PROTECTED AT ALL TIMES UNTIL FINAL ACCEPTANCE BY THE OWNER. CARE SHALL BE EXERCISED WHILE OPERATING EQUIPMENT ON, AND ADJACENT TO, THE WORK AREA. THE CONTRACTOR SHALL BE RESPONSIBLE TO ASSURE THE UTILIZED EQUIPMENT DOES NOT CAUSE DAMAGE TO EXISTING AND ADJACENT FEATURES NOT SCHEDULED FOR DEMOLITION OR REMOVAL.
2. ACCESS TO VARIOUS PORTIONS OF THE SITE SHALL BE UNDERTAKEN IN SUCH A MANNER THAT THE WORK AND SITE ARE PROTECTED AT ALL TIMES. ACCESS WAYS SHALL BE CONSTRUCTED, MAINTAINED, AND PROTECTED WITH SEDIMENT CONTROLS TO PREVENT DAMAGE FROM EROSION DURING MAJOR STORM EVENTS.
3. PLACEMENT AND COMPACTION OF FILL MATERIALS SHALL BE COMPLETED IN ACCORDANCE WITH THE PROJECT MANUAL AND IN SUCH A MANNER THAT THE WORK AND ADJACENT PROPERTIES ARE PROTECTED FROM DAMAGE AT ALL TIMES.
4. CONSTRUCT IN-RIVER IMPROVEMENTS AND MAINTAIN IN-RIVER WORK AREAS IN ACCORDANCE WITH THE PROJECT'S APPROVED WATER CONTROL & CONSTRUCTION SEQUENCING PLANS. IN THE EVENT THAT FLOOD FLOWS ARE EXPECTED TO EXCEED THE ELEVATIONS OF THE PROPOSED TEMPORARY RIVER CROSSING AND COFFERDAM SYSTEMS; PROTECT ANY NON-STABLE OR ERODIBLE IMPROVEMENTS USING APPROPRIATELY SIZED STONE RIPRAP MATERIAL (OR SIMILAR) AND REMOVE ALL EQUIPMENT AND PERSONNEL FROM IN-RIVER LOCATIONS.

EROSION AND SEDIMENT CONTROL

1. PRIOR TO THE COMMENCEMENT OF CONSTRUCTION ACTIVITIES, INSTALL ALL EROSION AND SEDIMENT CONTROL DEVICES AS SHOWN ON THE PLAN OR AS REQUIRED BY SITE CONDITIONS. ALL EROSION CONTROL DEVICES WILL BE MAINTAINED THROUGHOUT CONSTRUCTION.
2. DISTURBANCE OF SOIL SURFACES IS REGULATED BY STATE LAW AND LOCAL ORDINANCE. ALL WORK SHALL COMPLY WITH THESE EROSION AND SEDIMENT CONTROL NOTES AND OTHER PERMIT CONDITIONS TO PREVENT OR MINIMIZE SOIL EROSION AND SEDIMENTATION TO OFF-SITE AREAS.
3. THE CONTRACTOR SHALL COMPLY WITH THE LATEST EDITION OF THE "MASSACHUSETTS EROSION AND SEDIMENT CONTROL GUIDELINES FOR URBAN AND SUBURBAN AREAS" IN CONSTRUCTING THE EROSION AND SEDIMENT CONTROLS INDICATED ON THE PLANS. ALL EROSION AND SEDIMENT CONTROL MEASURES OR WORKS AND REHABILITATION MEASURES MUST CONFORM TO OR EXCEED THE SPECIFICATIONS OR STANDARDS SET OUT IN THIS DOCUMENT.
4. THE CONTRACTOR IS RESPONSIBLE FOR THE TIMELY INSTALLATION, INSPECTION, MAINTENANCE, AND/OR REPLACEMENT OF ALL TEMPORARY AND PERMANENT EROSION CONTROL DEVICES SHOWN ON THESE PLANS TO ENSURE PROPER OPERATION THROUGHOUT THE LIFE OF THE PROJECT. REMOVE EROSION AND SEDIMENTATION CONTROLS AFTER STABLE VEGETATIVE GROWTH IS ESTABLISHED BY THE OWNER, ENGINEER OR LANDSCAPE ARCHITECT.
5. THE CONTRACTOR SHALL INSPECT EROSION AND SEDIMENT CONTROL DEVICES ON A WEEKLY BASIS, AFTER EACH STORM EVENT, AND AT LEAST DAILY DURING PROLONGED RAINFALL. CLEAN OUT ACCUMULATED SEDIMENT BEHIND CONTROLS. REPAIR OR REPLACE CONTROLS PROMPTLY AS NEEDED. REMOVE ACCUMULATED SEDIMENT FROM BEHIND PERIMETER CONTROLS (I.E. BIODEGRADABLE COIR ROLLS AND SILT FENCING) WHEN ONE-THIRD OF THE ORIGINAL HEIGHT OF THE CONTROLS BECOME FILLED WITH SEDIMENT. DISPOSE OF REMOVED SEDIMENT IN ON-SITE FILL AREAS OR LAWFULLY OFF-SITE.
6. TREES AND OTHER EXISTING VEGETATION NOT WITHIN THE LIMITS OF DISTURBANCE SHALL BE PROTECTED FROM DAMAGE. VEGETATED AREAS AND/OR TREES DAMAGED THAT ARE NOT PLANNED FOR REMOVAL SHALL BE RESTORED TO THEIR ORIGINAL CONDITION OR BETTER TO THE SATISFACTION OF THE CITY.
7. IT SHALL BE THE CONTRACTOR'S RESPONSIBILITY TO CLEAN ROADS, CONTROL DUST, AND TAKE ALL NECESSARY MEASURES TO ENSURE THAT THE SITE AND ALL ADJACENT AREAS SHALL BE KEPT FREE OF MUD IN A MUD- AND DUST-FREE CONDITION AT ALL TIMES THROUGHOUT THE LIFE OF THE CONTRACT. DUST CONTROL SHALL INCLUDE, BUT IS NOT LIMITED TO, WATER AND/OR CRUSHED STONE OR COARSE GRAVEL.
8. ALL PROPOSED TEMPORARY STONE CONSTRUCTION ENTRANCES SHALL BE CONSTRUCTED AS SHOWN ON THE PLANS AND DETAILS. ALL VEHICLE TRAFFIC ENTERING OR EXITING THE PROJECT SITE SHALL PASS OVER THE CONSTRUCTION ENTRANCES TO REDUCE THE TRACKING OR FLOWING OF SEDIMENT ONTO THE SURROUNDING ROADWAYS. ENTRANCES SHALL BE MAINTAINED IN A CONDITION THAT WILL PREVENT TRACKING OR FLOWING OF SEDIMENT ONTO THE SURROUNDING ROADWAYS. THIS WILL REQUIRE PERIODIC TOP DRESSING WITH ADDITIONAL STONE OR ADDITIONAL LENGTH AS CONDITIONS DEMAND AND REPAIR AND/OR CLEANOUT OF ANY MEASURES USED TO TRAP SEDIMENT. ALL SEDIMENT SPILLED, DROPPED, WASHED, OR TRACKED ONTO THE SURROUNDING ROADWAYS AND PARKING AREAS MUST BE REMOVED IMMEDIATELY. ADDITIONAL ENTRANCES FOR CONSTRUCTION PHASING SHALL BE INSTALLED AS REQUIRED TO PREVENT TRACKING OR FLOWING OF SEDIMENT ONTO ROADWAYS.
9. THE CONTRACTOR SHALL INSTALL ALL PERIMETER SEDIMENT CONTROL BARRIERS (I.E. SILT FENCE) AS SHOWN ON THE PLANS. A SILT FENCE SHALL ALSO BE INSTALLED AROUND ANY SOIL STOCKPILE AREAS.
10. TEMPORARY VEGETATION COVER SHALL BE ESTABLISHED IMMEDIATELY IN ANY DISTURBED AREAS THAT HAVE NOT YET REACHED FINISHED GRADE AND CONSTRUCTION IS NOT EXPECTED TO RESUME FOR MORE THAN 14 DAYS. TEMPORARY VEGETATIVE COVER SHALL CONSIST OF SHORT-TERM EROSION CONTROL SEED (SUBSECTION M6.03.1 OF THE MASSDOT STANDARD SPECIFICATIONS) FROM APRIL 1 TO JUNE 1 AND AUGUST 15 TO OCTOBER 15. MAY ALSO BE INSTALLED BETWEEN OCTOBER 15 TO MARCH 31 IF COVERED WITH TEMPORARY MULCHING. SEED AT A RATE OF 75 LBS/ACRE BY HAND.
11. PERMANENT VEGETATIVE COVER SHALL BE ESTABLISHED TO ALL DISTURBED AREAS THAT HAVE REACHED FINISHED GRADE AS SOON AS POSSIBLE, BUT NOT MORE THAN 14 DAYS AFTER THE CONSTRUCTION ACTIVITY IN THAT AREA HAS PERMANENTLY CEASED. RECOMMENDED PERMANENT SEEDING DATES ARE APRIL 1 TO JUNE 1 AND AUGUST 15 TO OCTOBER 15. REFER TO RESTORATION PLANS FOR PERMANENT VEGETATIVE COVER SEED MIXTURES AND APPLICATION RATES. ALL PLANTINGS AND SEED SHALL BE COVERED BY A ONE-YEAR WARRANTY PERIOD; RESEEDING/RE-PLANTING SHALL BE COMPLETED TO ENSURE STABLE VEGETATIVE COVER IS ESTABLISHED OVER ALL DISTURBED AREAS.
12. IF PERMANENT SEEDING CANNOT BE COMPLETED WITHIN 14 DAYS OF THE COMPLETION OF CONSTRUCTION OR WITHIN THE RECOMMENDED SEEDING DATES, TE

SHOW WILDFLOWER SEED MIX
APPLICATION RATE: SHOWY WILDFLOWER SEED MIX = 23 LBS/ACRE

UPLAND/PARK SEED MIX
MIXTURE: SHALL BE IN ACCORDANCE WITH SECTION M.6.03.0-1 OF THE MASSDOT STANDARD SPECIFICATIONS FOR FLAT LAWN GRASS AREAS AND M6.03.0-2 FOR SLOPED LAWN GRASS AREAS.
APPLICATION RATE: 25 LBS/ACRE

RESTORATION NOTES:

1. CONSTRUCTION ACCESS ROUTES AND STAGING AREAS WITHIN CASHMAN'S PARK AREA THAT WERE PREVIOUSLY MAINTAINED AS LAWN AREA SHALL BE COVERED WITH TOPSOIL PRIOR TO SEEDING. ALL SEED MIXES SHALL BE FREE OF INVASIVE NON-NATIVE PLANT SPECIES.
2. AREAS TO BE STABILIZED BETWEEN SEPTEMBER THROUGH NOVEMBER SHALL BE OVERSEEDED WITH WINTER RYE (SECALE CEREALE).
3. STABILIZATION OF DISTURBED AREAS SHALL BE IMPLEMENTED WITHIN 14 DAYS AFTER GRADING OR CONSTRUCTION ACTIVITIES HAVE TEMPORARILY OR PERMANENTLY CEASED.
4. RESTORATION AREAS SHALL BE MULCHED WITH STRAW FOLLOWING SEEDING.

LIVE STAKE SPECIES

Select at least 4 of the following species in equal quantities

Black Willow (Salix nigra; OBL)
Silky Willow (Salix sericea; OBL)
Bebb's Willow (Salix bebbiana; FACW)
Pussy Willow (Salix discolor; FACW)
Speckled Alder (Alnus incana; FACW)
Silky Dogwood (Cornus amomum; FACW)
Red-osier Dogwood (Cornus sericea; NI)

Planting Density: 1 live stake every 3' on center.

PC3: AUTOCAD PDF (GENERAL DOCUMENTATION).PC3 STB/CTB: FO HALF.STB
LAYER STATE:
MS VIEW:

GENERAL WATER CONTROL SYSTEM NOTES:

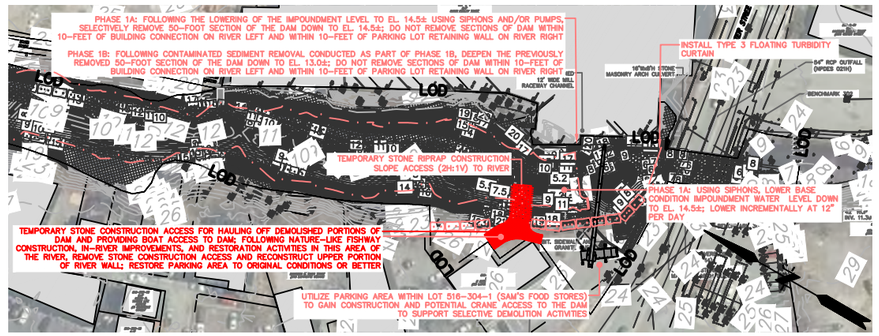
1. PRIOR TO ANY LAND DISTURBANCE ACTIVITIES, THE CONTRACTOR MUST PHYSICALLY MARK THE LIMITS OF DISTURBANCE IN ACCORDANCE WITH THE APPROVED PLANS.
2. THE TEMPORARY COFFERDAMS, RIVER CROSSINGS, AND HAUL ROADS MUST BE INSTALLED DURING THE LOW FLOW PERIOD (I.E., THE PERIOD BETWEEN JULY 1 THROUGH OCTOBER 31). COFFERDAMMED AREAS, WHERE APPLICABLE, SHALL BE MAINTAINED TO ALLOW A DRY WORKING CONDITION (NO SEDIMENT PLUME) IN THE WATERCOURSE. SOIL DISTURBANCE IN COFFERDAMMED AREAS OR THE WATERCOURSE MUST TEMPORARILY CEASE IN THE EVENT OF ANY ABNORMALLY HIGH STORMWATER RUNOFF EVENT THAT OVERTOPS THE COFFERDAMS OR TEMPORARY RIVER CROSSINGS.
3. SELECTIVE DEMOLITION/REMOVAL OF THE DAM MUST BE CONDUCTED SEQUENTIALLY TO CONTROL UPSTREAM DRAWDOWN TO NO MORE THAN TWELVE (12) INCHES PER DAY.
4. OBTAIN CONFIRMATORY ELEVATIONS OF THE RIVER CHANNEL BOTTOM ALONG THE PROPOSED ALIGNMENTS OF THE TEMPORARY COFFERDAMS AND RIVER CROSSINGS TO VERIFY EXISTING CONDITIONS AND ACTUAL COFFERDAM HEIGHTS PRIOR TO INSTALLATION.
5. THIS PLAN ILLUSTRATES ONE CONCEPTUAL APPROACH TO WATER CONTROL FOR THE PROJECT. THE CONTRACTOR SHALL SUBMIT A FINAL WATER CONTROL PLAN TO FUSS & O'NEILL AND THE MASSDEP FOR REVIEW WITH ADEQUATE TIME FOR THEIR REVIEW AND ACCEPTANCE PRIOR TO THE INITIATION OF CONSTRUCTION.
6. TEMPORARY HAUL ROADS, COFFERDAMS, TEMPORARY RIVER CROSSINGS, AND BYPASS PROVISIONS SHALL BE MAINTAINED THROUGHOUT THE CONSTRUCTION PERIOD TO ENSURE RESPECTIVE COMPONENTS FUNCTION AS INTENDED TO PROTECT ADJACENT PROPERTIES, WETLAND RESOURCES AND DOWNSTREAM WORK AREAS.

PHASE 1A:

1. AFTER MOBILIZING AT CASHMAN PARK AND INSTALLING TEMPORARY EROSION CONTROL MEASURES AT THE PORTION OF THE PARKING LOT OF PARCEL 516-304-1 (SAM'S FOOD STORE PROPERTY) AND CASHMAN PARK AREA WITHIN THE LIMIT OF DISTURBANCE, THE CONTRACTOR SHALL INSTALL FLOATING TURBIDITY BARRIER JUST UPSTREAM OF THE WINTER STREET BRIDGE OPENING. THE FLOATING TURBIDITY BARRIER MUST BE A TYPE III BARRIER CAPABLE OF PASSING FLOW VELOCITIES UP TO 5 FEET PER SECOND.
2. THE CONTRACTOR SHALL THEN INSTALL THE TEMPORARY CONSTRUCTION ACCESS TO THE RIVER AT PARCEL 516-304-1, REMOVE 20-FOOT SECTION OF THE FREESTANDING PORTION OF THE PARKING LOT RETAINING WALL BEHIND THE SAM'S STORE BUILDING STRUCTURE (OR AS REQUIRED AND APPROVED BY OWNER TO FACILITATE ACCESS), AND CONSTRUCT TEMPORARY STONE RIPRAP ACCESS DOWN THE SLOPE (AT NO STEEPER THAN 2H:1V) IN ORDER TO GAIN ACCESS TO THE IMPOUNDMENT JUST UPSTREAM OF THE DAM FROM PARCEL 516-304-1 FOR CONSTRUCTION EQUIPMENT AND/OR BARGE ACCESS TO DAM. THE STONE RIPRAP USED TO CONSTRUCT THE TEMPORARY STONE RIPRAP ACCESS SHALL BE CONSTRUCTED OF SAME STONE MATERIAL USED TO PERMANENTLY STABILIZE THE LOWER SLOPE OF THE PROPOSED RIVER CHANNEL SIDESLOPES. THIS STONE IS TO REMAIN STABLE DURING FLOOD FLOWS.
3. USING SIPHONS AND/OR PUMPS, INCREMENTALLY LOWER THE IMPOUNDMENT BY 12-INCHES PER DAY TO DOWN TO EL. 14.5 FEET. THIS SHOULD TAKE APPROXIMATELY 4 WORK DAYS ASSUMING NO SUBSTANTIAL RAINFALL EVENTS OCCUR. THIS WILL ALSO ALLOW THE NEWLY EXPOSED AREAS ALONG THE RIVER BANK TIME TO BEGIN TO DRAIN AND STABILIZE.
4. ONCE THE BASE CONDITION WATER SURFACE WITHIN THE IMPOUNDMENT HAS BEEN LOWERED TO EL. 14.5 FEET, REMOVE A 50-FOOT SECTION OF THE UPPER PORTION OF THE DAM USING BARGE MOUNTED EQUIPMENT OR BY CRANE FROM ADJACENT PARKING LOT (ON PARCEL 516-304-1) DOWN TO EL. 14.50 FEET, DO NOT DISTURB SECTION OF DAM WITHIN 10-FEET OF ITS CONNECTION TO BUILDING ON RIVER LEFT AND WITHIN 10-FEET OF ITS CONNECTION TO RIVER WALL ON RIVER RIGHT. THIS WILL BE CONSIDERED THE FIRST PHASE OF THE INCREMENTAL REMOVAL OF THE DAM. REMOVING THE DAM INCREMENTALLY WILL MINIMIZE THE POTENTIAL FOR SEDIMENT TO MOBILIZE DOWNSTREAM, ALLOW THE BED AND NEWLY EXPOSED BANKS OF THE IMPOUNDMENT AND STREAM TO DRAIN AND STABILIZE, AND PREVENT A SUDDEN RELEASE OF WATER WHICH COULD UNNECESSARILY DAMAGE DOWNSTREAM INFRASTRUCTURE AND/OR HABITAT.

PHASE 1B:

1. ONCE THE BASE FLOW CONDITION WATER SURFACE ELEVATION IS LOWERED TO APPROXIMATELY EL. 15.0 WITHIN THE ENTIRE IMPOUNDMENT FROM THE DAM UP TO THE MBTA BRIDGE, CONSTRUCT TEMPORARY RIVER CROSSING AT CASHMAN'S PARK (WITH A TOP WIDTH OF 12 FEET). THIS RIVER CROSSING WILL BE CONSTRUCTED OF STONE RIPRAP EQUIVALENT IN SIZE TO THAT USED TO STABILIZE THE LOWER SIDESLOPES OF THE PROPOSED RIVER CHANNEL. THE CROSSING WILL BE CONSTRUCTED WITH (4) 48-INCH CULVERTS THAT WILL PASS APPROXIMATELY 380 CFS AT FULL CAPACITY. THIS FLOW IS EQUIVALENT TO THE BANKFULL FLOW. BANKFULL FLOW CONDITIONS ARE APPROXIMATELY EQUIVALENT TO THE 1.5-YEAR RECURRENCE INTERVAL FLOOD EVENT. INLET CONTROL DEVICES SHALL BE INSTALLED ON UPSTREAM ENDS OF CULVERTS TO ALLOW FOR THE REGULATION OF FLOW THROUGH CULVERTS.
2. ONCE CONSTRUCTION OF THE TEMPORARY RIVER CROSSING IS COMPLETE, CONTINUE CONSTRUCTION OF A STONE ACCESS/HAUL ROAD (WITH A 10-FOOT MINIMUM TOP WIDTH) BETWEEN THE TEMPORARY RIVER CROSSING AND THE AREA OF SEDIMENT CONTAMINATION. THE TEMPORARY HAUL ROAD WILL FOLLOW THE ALIGNMENT OF THE TOP OF LEFT BANK OF THE PROPOSED RIVER CHANNEL. AS A RESULT, CONSTRUCTING THIS HAUL ROAD WILL ALSO ASSIST IN FORMING A STABLE LEFT BANK FOR THE PROPOSED RIVER CHANNEL.
3. ONCE THE HAUL ROAD HAS BEEN BUILT TO THE APPROXIMATE AREA OF SEDIMENT CONTAMINATION, CONSTRUCT A TEMPORARY RIVER CROSSING (WITH A 12-FOOT TOP WIDTH) JUST UPSTREAM OF THE AREA NEAR LITTLE RIVER STREET. THE ROAD SHALL BE CONSTRUCTED FROM THE TEMPORARY HAUL ROAD AS OPPOSED TO CONSTRUCTING FROM LITTLE RIVER STREET. THIS TEMPORARY RIVER CROSSING WILL BE CONSTRUCTED OF STONE RIPRAP EQUIVALENT IN SIZE TO THAT USED TO STABILIZE THE LOWER SIDESLOPES OF THE PROPOSED RIVER CHANNEL. THE CROSSING WILL BE CONSTRUCTED WITH (4) 48-INCH CULVERTS THAT WILL PASS APPROXIMATELY 380 CFS AT FULL CAPACITY. THE PURPOSE OF THIS CROSSING WILL BE TO GAIN ACCESS TO BOTH SIDES OF THE RIVER CHANNEL FOR SEDIMENT REMOVAL AND TO CONSTRUCT IN-CHANNEL RIVER IMPROVEMENTS.
4. USING LARGE SANDBAGS OR EQUAL, CONSTRUCT A TEMPORARY COFFERDAM DOWN THE APPROXIMATE CENTER OF THE RIVER CHANNEL BETWEEN THE TEMPORARY RIVER CROSSING AND DOWNSTREAM LIMIT OF CONTAMINATED SEDIMENT AREA. CAP/BLOCK THE INLET TO THE EASTERN CULVERTS AND ISOLATE THE EASTERN HALF OF THE RIVER USING COFFERDAM SYSTEM. ONLY ALLOW FLOW THROUGH THE WESTERN CULVERTS. INSTALL TEMPORARY DEWATERING AREA ATOP THE WESTERN HALF OF THE TEMPORARY RIVER CROSSING AND UTILIZE CONSTRUCTION DEWATERING PUMPS TO CREATE A DRY WORKING AREA WITHIN THE LIMITS OF THE COFFERDAM. PERFORM SEDIMENT REMOVAL OPERATIONS. HAUL SEDIMENT TO CASHMAN PARK TEMPORARY SOIL STORAGE AREA FOR DEWATERING AND ULTIMATE TRANSPORT OFF-SITE. THE TOP OF THE COFFERDAM SYSTEM SHALL BE SET TO PROTECT WORK AREA FOR MAXIMUM RIVER FLOWS OF UP TO APPROXIMATELY 100 CFS (OR 3-FEET FLOW DEPTH THROUGH DIVERTED HALF OF RIVER CHANNEL) AT MINIMUM WITHOUT OVERTOPPING.
5. ONCE CONTAMINATED SEDIMENT HAS BEEN REMOVED IN THE EASTERN HALF OF THE RIVER, ROUGH GRADE LEFT BANK AND CHANNEL BOTTOM IN THIS LOCATION TO PROPOSED GRADE AND STABILIZE WITH LOWER SLOPE PROTECTION AND CHANNEL BOTTOM STABILIZATION MEASURES.
6. REMOVE TEMPORARY DEWATERING AREA ON THE RIVER CROSSING AND SHIFT TO THE UPPER LEFT BANK OF RIVER AT EL. 17.5± OR ABOVE. ADJUST TEMPORARY COFFERDAM SYSTEM TO ISOLATE THE WESTERN SIDE OF RIVER. SLOWLY ALLOW FLOW THROUGH THE EASTERN CULVERTS AND CAP/BLOCK WESTERN CULVERTS. UTILIZE CONSTRUCTION DEWATERING PUMPS TO CREATE A DRY WORKING AREA WITHIN WESTERN COFFERDAMMED AREA. PERFORM SEDIMENT REMOVAL OPERATIONS IN WESTERN HALF OF RIVER. HAUL SEDIMENT TO CASHMAN PARK TEMPORARY SOIL STORAGE AREA FOR DEWATERING AND ULTIMATE TRANSPORT OFF-SITE. ONCE CONTAIMINATED SEDIMENT HAS BEEN REMOVED, ROUGH GRADE RIGHT BANK AND CHANNEL BOTTOM TO PROPOSED GRADE AND STABILIZE WITH LOWER SLOPE PROTECTION AND CHANNEL BOTTOM STABILIZATION MEASURES.
7. ONCE IN-RIVER IMPROVEMENTS ARE COMPLETE IN THIS LOCATION, REMOVE TEMPORARY COFFERDAM SYSTEM AND TEMPORARY RIVER CROSSING (WITH CULVERTS) AT LITTLE RIVER STREET AREA. STONE RIPRAP USED TO CONSTRUCT TEMPORARY RIVER CROSSING CAN BE USED ELSEWHERE AS STABILIZATION FOR LOWER RIVER CHANNEL SLOPE AND CHANNEL BOTTOM PROTECTION OF RIVER CHANNEL.



WATER CONTROL – PHASE 1A & 1B (INCREMENTAL REMOVAL OF DAM AND LOWERING OF HEADPOND)

SCALE: 1"= 140'

PHASE 1C:

1. ONCE CONTAMINATED SEDIMENT HAS BEEN FULLY REMOVED, CONTINUE CONSTRUCTION OF STONE ACCESS/HAUL ROAD (WITH A 10-FOOT TOP WIDTH) BETWEEN THE TEMPORARY RIVER CROSSING AT CASHMAN PARK AND THE UPSTREAM LIMIT OF PROPOSED CONSTRUCTION. THIS PORTION OF THE TEMPORARY HAUL ROAD WILL ALSO FOLLOW THE ALIGNMENT OF THE TOP OF LEFT BANK OF THE PROPOSED RIVER CHANNEL. AS A RESULT, CONSTRUCTING THIS HAUL ROAD WILL ALSO ASSIST IN FORMING A STABLE LEFT BANK FOR THE PROPOSED RIVER CHANNEL. CONSTRUCT TEMPORARY RIVER CROSSING WITH A 12-FOOT TOP WIDTH AND WITH (4) 48-INCH CULVERTS JUST UPSTREAM OF PROPOSED UPSTREAM GRADE CONTROL BOULDER SYSTEM AND SCOUR POOL. INSTALL CULVERTS WITH INLET AND/OR OUTLET CONTROL DEVICES THAT WILL ALLOW FLOW TO BE REGULATED. CONSTRUCTING THIS SYSTEM WILL ASSIST IN MINIMIZING UPSTREAM IMPACTS DURING THIS PHASE OF CONSTRUCTION.
2. FOLLOWING CONSTRUCTION OF THE UPSTREAM TEMPORARY RIVER CROSSING, PERFORM THE SECOND PHASE OF INCREMENTAL DAM REMOVAL. LOWER THE DAM CREST FROM EL. 14.5± FEET DOWN TO EL. 12.0±. THIS WILL LOWER THE BASE FLOW CONDITION WATER SURFACE ELEVATION TO BETWEEN APPROXIMATELY EL. 12.0± AND EL. 13.5± WITHIN THE ENTIRE IMPOUNDMENT FROM THE DAM UP TO THE UPSTREAM RIVER CROSSING.
3. CONSTRUCT LARGE SANDBAG OR SIMILAR COFFERDAM SYSTEM DOWN THE APPROXIMATE CENTER OF THE RIVER CHANNEL BETWEEN THE UPSTREAM TEMPORARY RIVER CROSSING AND THE TEMPOORARY RIVER CROSSING AT CASHMAN PARK. CAP/BLOCK THE INLET TO THE EASTERN CULVERTS AND ISOLATE THE EASTERN HALF OF THE RIVER USING COFFERDAM SYSTEM. ONLY ALLOW FLOW THROUGH THE WESTERN CULVERTS. CONSTRUCT IN-RIVER IMPROVEMENTS AND LOWER BANK STABILIZATION MEASURES. CONSTRUCTING THIS SYSTEM WILL ASSIST IN MINIMIZING TEMPORARY UPSTREAM IMPACTS THROUGHOUT THE REMAINDER OF CONSTRUCTION. THE TOP OF THE COFFERDAM SYSTEM SHALL BE SET TO PROTECT WORK AREA FOR MAXIMUM RIVER FLOWS OF UP TO APPROXIMATELY 100 CFS (OR 3-FEET FLOW DEPTH THROUGH DIVERTED HALF OF RIVER CHANNEL) AT MINIMUM WITHOUT OVERTOPPING.
4. PERFORM RIVER CHANNEL IMPROVEMENTS BETWEEN THE UPSTREAM RIVER CROSSING AND THE FORMER AREA OF SEDIMENT CONTAMINATION AS INDICATED IN THE CONTRACT DOCUMENTS INCLUDING CHANNEL REALIGNMENT (INCLUDING SEDIMENT EXCAVATION AND RELOCATION), INSTALL GRADE CONTROL BOULDER WEIR NOS. 1 THRU 5, SCOUR POOL NOS. 1 THRU 5, LOWER AND UPPER SLOPE STABILIZATION MEASURES, FISHING PLATFORM AT CASHMAN PARK BELOW THE BANKFULL ELEVATION, AND VEGETATIVE RESTORATION MEASURES (I.E. SEEDING, AT MINIMUM, PRIOR TO WINTER SHUTDOWN).

WATER CONTROL SYSTEM CONSTRUCTION SEQUENCE NOTES:

NOTES ON THIS SHEET AND CW-102 ARE INTENDED TO SUPPORT THE WATER CONTROL CONSTRUCTION SEQUENCE AND CONCEPT AS DEPICTED ON THESE PLANS. THE CONTRACTOR SHALL SUBMIT A FINAL WATER CONTROL PLAN TO FUSS & O'NEILL AND THE MASSDEP FOR REVIEW WITH ADEQUATE TIME FOR THEIR REVIEW AND ACCEPTANCE PRIOR TO THE INITIATION OF CONSTRUCTION.

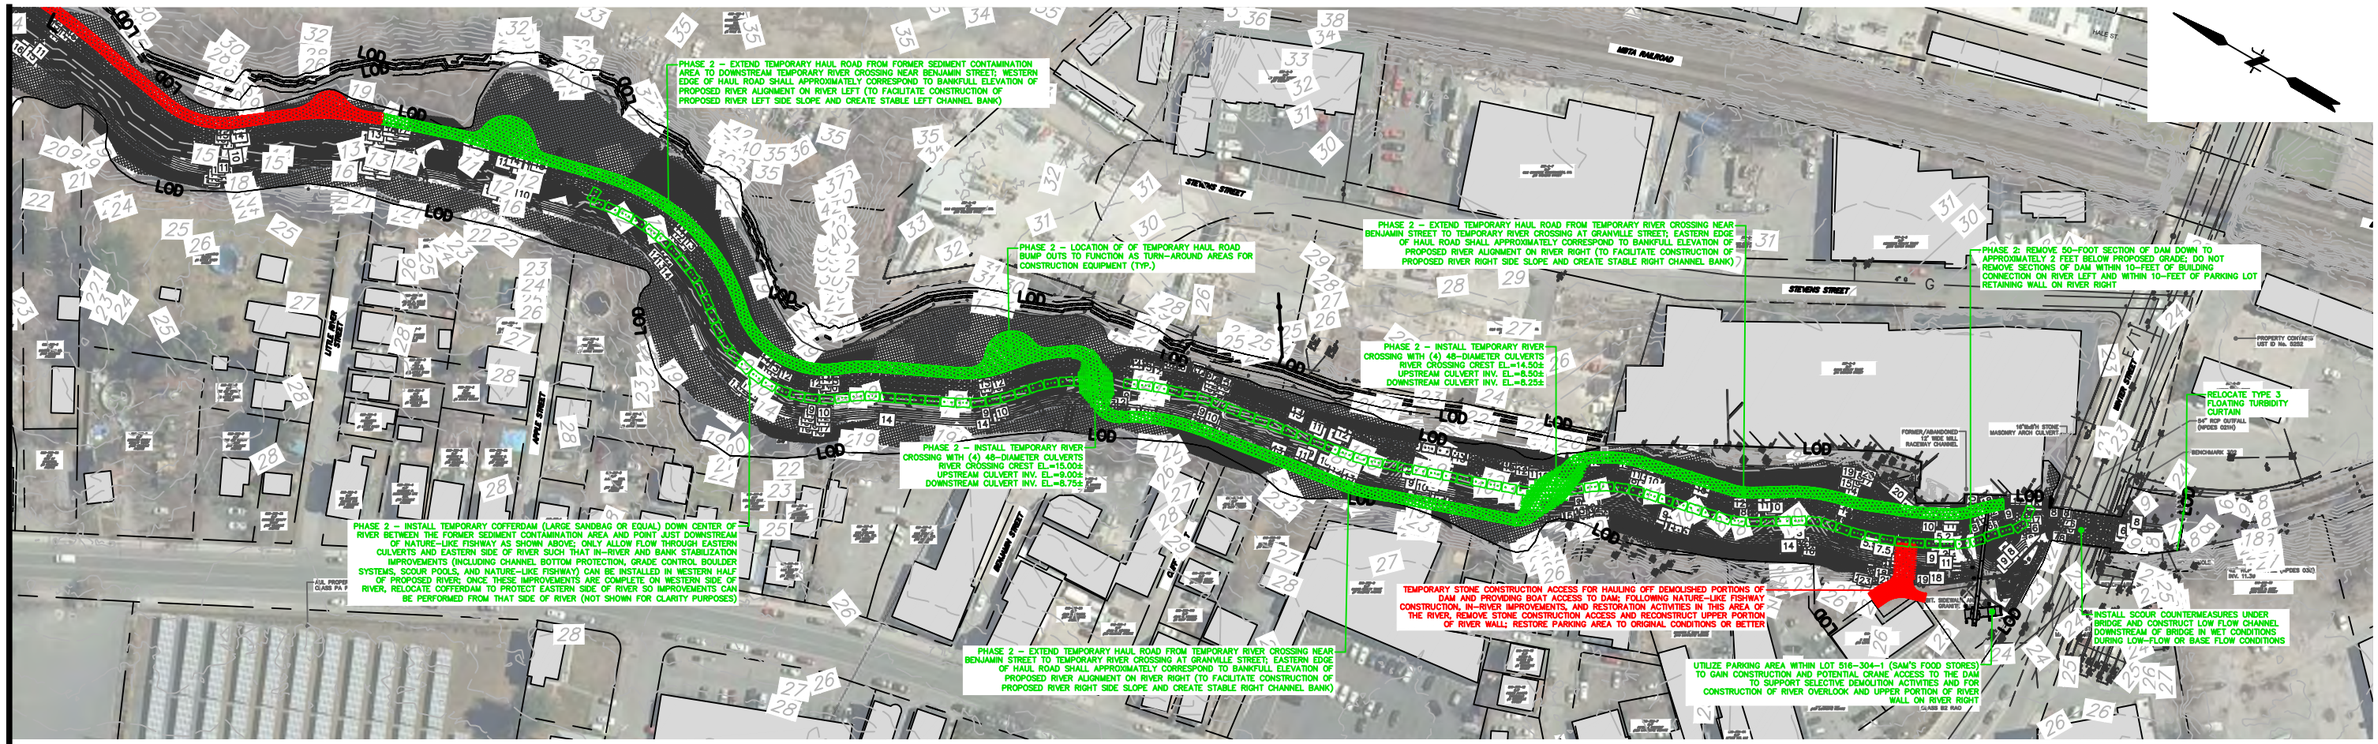
WATER CONTROL & CONSTRUCTION SEQUENCING PLAN NO. 1

LITTLE RIVER DAM REMOVAL AND RESTORATION

HAVERHILL MASSACHUSETTS

PROJ. No.: 20170390.U30
DATE: JUNE 2022

CW-101



PHASE 2 – EXTEND TEMPORARY HAUL ROAD FROM FORMER SEDIMENT CONTAMINATION AREA TO DOWNSTREAM TEMPORARY RIVER CROSSING NEAR BENJAMIN STREET; WESTERN EDGE OF HAUL ROAD SHALL APPROXIMATELY CORRESPOND TO BANKFULL ELEVATION OF PROPOSED RIVER ALIGNMENT ON RIVER LEFT (TO FACILITATE CONSTRUCTION OF PROPOSED RIVER LEFT SIDE SLOPE AND CREATE STABLE LEFT CHANNEL BANK)
PHASE 2 – LOCATION OF OF TEMPORARY HAUL ROAD BUMP OUTS TO FUNCTION AS TURN-AROUND AREAS FOR CONSTRUCTION EQUIPMENT (TYP.)
PHASE 2 – EXTEND TEMPORARY HAUL ROAD FROM TEMPORARY RIVER CROSSING NEAR BENJAMIN STREET TO TEMPORARY RIVER CROSSING AT GRANVILLE STREET; EASTERN EDGE OF HAUL ROAD SHALL APPROXIMATELY CORRESPOND TO BANKFULL ELEVATION OF PROPOSED RIVER ALIGNMENT ON RIVER RIGHT (TO FACILITATE CONSTRUCTION OF PROPOSED RIVER RIGHT SIDE SLOPE AND CREATE STABLE RIGHT CHANNEL BANK)
PHASE 2 – INSTALL TEMPORARY RIVER CROSSING WITH (4) 48-DIAMETER CULVERTS RIVER CROSSING CREST EL.=14.50± UPSTREAM CULVERT INV. EL.=8.50± DOWNSTREAM CULVERT INV. EL.=8.25±
PHASE 2: REMOVE 50-FOOT SECTION OF DAM DOWN TO APPROXIMATELY 2 FEET BELOW PROPOSED GRADE; DO NOT REMOVE SECTIONS OF DAM WITHIN 10-FEET OF BUILDING CONNECTION ON RIVER LEFT AND WITHIN 10-FEET OF PARKING LOT RETAINING WALL ON RIVER RIGHT
PHASE 2 – INSTALL TEMPORARY RIVER CROSSING WITH (4) 48-DIAMETER CULVERTS RIVER CROSSING CREST EL.=15.00± UPSTREAM CULVERT INV. EL.=9.00± DOWNSTREAM CULVERT INV. EL.=8.75±
PHASE 2 – INSTALL TEMPORARY COFFERDAM (LARGE SANDBAG OR EQUAL) DOWN CENTER OF RIVER BETWEEN THE FORMER SEDIMENT CONTAMINATION AREA AND POINT JUST DOWNSTREAM OF NATURE-LIKE FISHWAY AS SHOWN ABOVE; ONLY ALLOW FLOW THROUGH EASTERN CULVERTS AND EASTERN SIDE OF RIVER SUCH THAT IN-RIVER AND BANK STABILIZATION IMPROVEMENTS (INCLUDING CHANNEL BOTTOM PROTECTION, GRADE CONTROL BOULDER SYSTEMS, SCOUR POOLS, AND NATURE-LIKE FISHWAY) CAN BE INSTALLED IN WESTERN HALF OF PROPOSED RIVER; ONCE THESE IMPROVEMENTS ARE COMPLETE ON WESTERN SIDE OF RIVER, RELOCATE COFFERDAM TO PROTECT EASTERN SIDE OF RIVER SO IMPROVEMENTS CAN BE PERFORMED FROM THAT SIDE OF RIVER (NOT SHOWN FOR CLARITY PURPOSES)
PHASE 2 – EXTEND TEMPORARY HAUL ROAD FROM TEMPORARY RIVER CROSSING NEAR BENJAMIN STREET TO TEMPORARY RIVER CROSSING AT GRANVILLE STREET; EASTERN EDGE OF HAUL ROAD SHALL APPROXIMATELY CORRESPOND TO BANKFULL ELEVATION OF PROPOSED RIVER ALIGNMENT ON RIVER RIGHT (TO FACILITATE CONSTRUCTION OF PROPOSED RIVER RIGHT SIDE SLOPE AND CREATE STABLE RIGHT CHANNEL BANK)
TEMPORARY STONE CONSTRUCTION ACCESS FOR HAULING OFF DEMOLISHED PORTIONS OF DAM AND PROVIDING BOAT ACCESS TO DAM; FOLLOWING NATURE-LIKE FISHWAY CONSTRUCTION, IN-RIVER IMPROVEMENTS, AND RESTORATION ACTIVITIES IN THIS AREA OF THE RIVER, REMOVE STONE CONSTRUCTION ACCESS AND RECONSTRUCT UPPER PORTION OF RIVER WALL; RESTORE PARKING AREA TO ORIGINAL CONDITIONS OR BETTER
UTILIZE PARKING AREA WITHIN LOT 516-304-1 (SAM'S FOOD STORES) TO GAIN CONSTRUCTION AND POTENTIAL CRANE ACCESS TO THE DAM TO SUPPORT SELECTIVE DEMOLITION ACTIVITIES AND FOR CONSTRUCTION OF RIVER OVERLOOK AND UPPER PORTION OF RIVER WALL ON RIVER RIGHT
RELOCATE TYPE 3 FLOATING TURBIDITY CURTAIN
INSTALL SCOUR COUNTERMEASURES UNDER BRIDGE AND CONSTRUCT LOW FLOW CHANNEL DOWNSTREAM OF BRIDGE IN WET CONDITIONS DURING LOW-FLOW OR BASE FLOW CONDITIONS

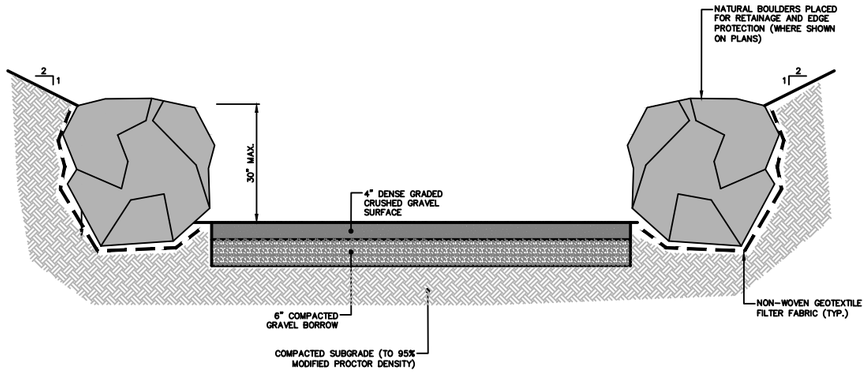
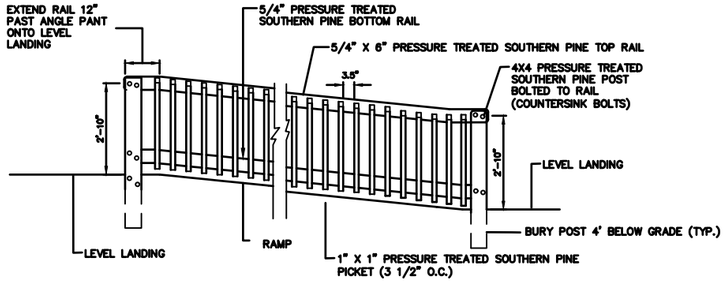
GRAVEL WALKWAY/ACCESS PATH (AT CASHMAN PARK)

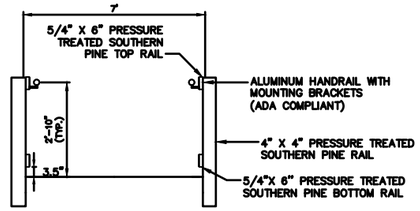
NOT TO SCALE



KAYAK/CANOE ACCESS PATH (AT CASHMAN PARK)

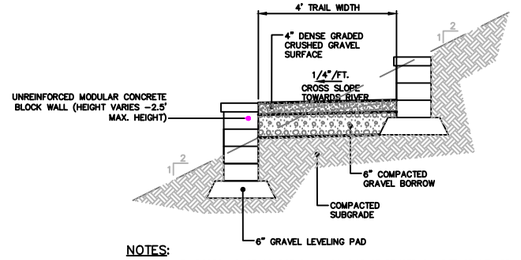
NOT TO SCALE





TIMBER HANDRAIL (AT KAYAK/CANOE ACCESS)

NOT TO SCALE

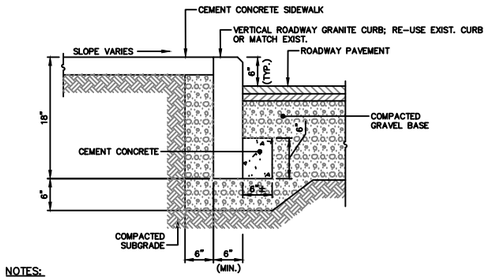


NOTES:

1. GRAVEL BORROW BASE COURSE SHALL CONSIST OF REUSED ON-SITE GRAVEL OR IMPORTED GRAVEL MEETING THE GRADATION REQUIREMENTS OF M.1.03 OF THE MASSDOT STANDARD SPECIFICATIONS.
2. DENSE GRADED CRUSHED GRAVEL SURFACE SHALL CONSIST OF GRAVEL SURFACE MATERIAL MEETING THE REQUIREMENTS OF M2.05.0 OF THE MASSDOT STANDARD SPECIFICATIONS.
3. ALIGNMENT OF TRAIL MAY VARY SLIGHTLY WITHIN LIMIT OF DISTURBANCE (AS FIELD DIRECTED BY ENGINEER) IN ORDER TO MINIMIZE TREE AND VEGETATION REMOVAL.

COMPACTED GRAVEL WALKING TRAIL

NOT TO SCALE

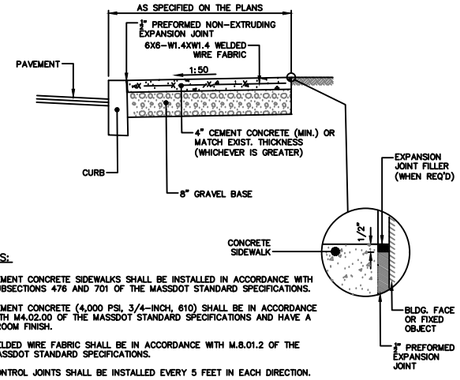


NOTES:

1. CURBING SHALL BE INSTALLED IN ACCORDANCE WITH SUBSECTION 501 OF THE MASSDOT STANDARD SPECIFICATIONS.
2. GRANITE CURB, GRANITE CURB INLETS, AND GRANITE CURB CORNERS SHALL BE IN ACCORDANCE WITH M9.04.1, M9.04.5, AND M9.04.6 OF THE MASSDOT STANDARD SPECIFICATIONS, RESPECTIVELY.
3. CEMENT CONCRETE (3,000 PSI, 3/4-INCH, 520) SHALL BE IN ACCORDANCE WITH M4.02.00 OF THE MASSDOT STANDARD SPECIFICATIONS AND INSTALLED IN ACCORDANCE WITH SUBSECTION 476 OF THE MASSDOT STANDARD SPECIFICATIONS.
4. MORTAR FOR CURBING JOINTS SHALL BE IN ACCORDANCE WITH M4.02.15 OF THE MASSDOT STANDARD SPECIFICATIONS.

VERTICAL ROADWAY GRANITE CURB

NOT TO SCALE



NOTES:

1. CEMENT CONCRETE SIDEWALKS SHALL BE INSTALLED IN ACCORDANCE WITH SUBSECTIONS 476 AND 701 OF THE MASSDOT STANDARD SPECIFICATIONS.
2. CEMENT CONCRETE (4,000 PSI, 3/4-INCH, 610) SHALL BE IN ACCORDANCE WITH M4.02.00 OF THE MASSDOT STANDARD SPECIFICATIONS AND HAVE A BROOM FINISH.
3. WELDED WIRE FABRIC SHALL BE IN ACCORDANCE WITH M.8.01.2 OF THE MASSDOT STANDARD SPECIFICATIONS.
4. CONTROL JOINTS SHALL BE INSTALLED EVERY 5 FEET IN EACH DIRECTION.
5. EXPANSION JOINTS SHALL BE INSTALLED EVERY 20 FEET IN EACH DIRECTION AT FOUNDATIONS AND WALLS IN IN A SQUARE PATTERN AROUND MANHOLE COVERS, HYDRANTS, SIGN POSTS AND UTILITY POLES. THE EXPANSION JOINT SHALL BE THE FULL DEPTH OF THE SIDEWALK AND FILLED WITH AN APPROVED TYPE OF PREMOLDED EXPANSION JOINT FILLER IN ACCORDANCE WITH M.9.14.0 OF THE MASSDOT STANDARD SPECIFICATIONS.

CEMENT CONCRETE SIDEWALK

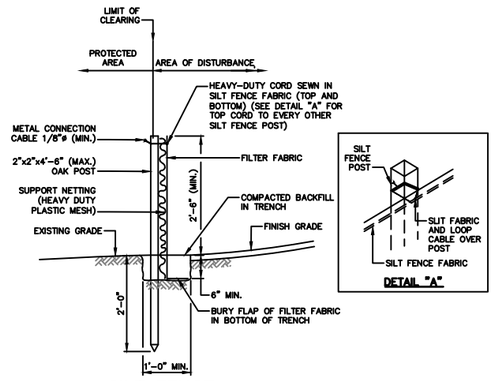
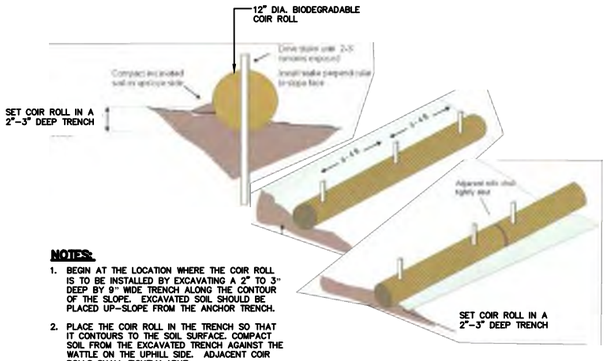
TEMPORARY RIVER CROSSING
NOT TO SCALE



SILT FENCE
NOT TO SCALE



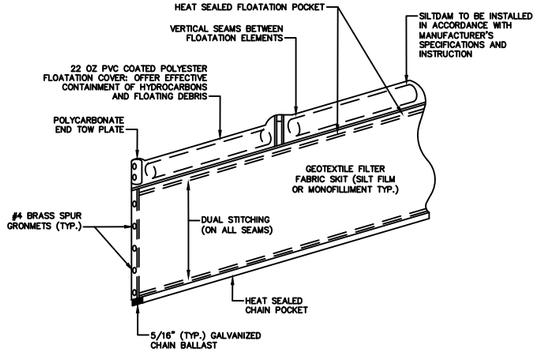
NOTES:

1. BEGIN AT THE LOCATION WHERE THE COIR ROLL IS TO BE INSTALLED BY EXCAVATING A 2" TO 3" DEEP BY 9" WIDE TRENCH ALONG THE CONTOUR OF THE SLOPE. EXCAVATED SOIL SHOULD BE PLACED UP-SLOPE FROM THE ANCHOR TRENCH.
2. PLACE THE COIR ROLL IN THE TRENCH SO THAT IT CONTOURS TO THE SOIL SURFACE. COMPACT SOIL FROM THE EXCAVATED TRENCH AGAINST THE WATTLE ON THE UPHILL SIDE. ADJACENT COIR ROLLS SHALL TIGHTLY ABUT.
3. SECURE THE COIR ROLL WITH 36" LONG (2"x2") STAKES SPACED EVERY 3' TO 4' ON CENTER AND WITH A STAKE ON EACH END. STAKES SHOULD BE DRIVEN THROUGH THE MIDDLE OF THE COIR ROLL LEAVING AT LEAST 2" TO 3" OF STAKE EXTENDING ABOVE THE COIR ROLL. STAKES SHALL BE DRIVEN PERPENDICULAR TO THE SLOPE FACE.

BIODEGRADABLE COIR ROLL (FOR PERIMETER EROSION CONTROL MEASURE)
NOT TO SCALE

1. OVERALL SUMP PIT DIMENSIONS SHALL BE COMPATIBLE WITH ANTICIPATED SEEPAGE RATES AND PUMP SIZE TO BE USED.
2. THE STANDPIPE DIAMETER AND NUMBER OF PERFORATIONS SHALL BE COMPATIBLE WITH THE PUMP SIZE BEING USED.
3. PERFORATIONS IN THE STANDPIPE SHALL BE EITHER CIRCULAR OR SLOTS. PERFORATION SIZE SHALL NOT EXCEED 1/2" IN DIAMETER.
4. **CRUSHED STONE SHALL CONFORM TO THE GRADATION LISTED FOR CRUSHED STONE IN SUBSECTION M2.01.4 OF THE MASSDOT STANDARD SPECIFICATIONS FOR 3/4-INCH CRUSHED STONE. CRUSHED STONE SHALL EXTEND A MINIMUM OF 12" BELOW THE BOTTOM OF THE STANDPIPE.**
5. IF EXCESSIVE MOVEMENT OF FINE SOIL PARTICLES FROM THE SURROUNDING EXISTING SOILS IS ANTICIPATED, A PROPERLY DESIGNED GEOTEXTILE SHALL BE PLACED BETWEEN THE EXISTING SOILS AND THE CRUSHED STONE OR GRAVEL BACKFILL.
6. THE STANDPIPE SHALL EXTEND A MINIMUM OF 12" ABOVE THE SURROUNDING GROUND.
7. **WHEN USED FOR WATER CONTROL DURING THE CONSTRUCTION OF THE LOWER SLOPE AND TOE PROTECTION ASSOCIATED WITH BIOENGINEERED SLOPE STABILIZATION, TREE REVETMENT SYSTEM, AND THE OUTFALL HEADWALL AND ASSOCIATED CHANNEL BOTTOM SCOUR PROTECTION; PUMP DISCHARGE MAY NEED TO BE DIVERTED THROUGH A DEWATERING BAG PRIOR TO BEING DIRECTED INTO THE BROOK IF IT IS DETERMINED BY THE ENGINEER THAT THE DISCHARGE IS TURBID OR CLOUDY.**

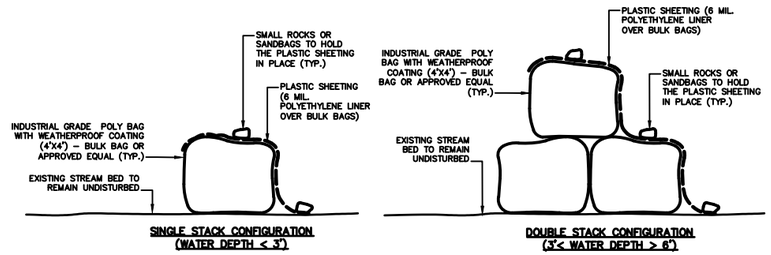
CRUSHED STONE SUMP DETAIL (FOR CONSTRUCTION DEWATERING PUMPS)
NOT TO SCALE



NOTES:

1. CURTAIN SHALL BE A TYPE III HEAVY DUTY CURTAIN THAT IS SUITABLE FOR INSTALLATION WITH FLOWS UP TO 5 FEET PER SECOND (FPS).
2. FLOATATION SIZE (6", 8" OR 12" DIA.) DETERMINED BY SKIRT DEPTH/SITE VARIABLES.
3. OTHER END TYPES AVAILABLE SUCH AS ALUMINUM UNIVERSAL SLIDE OR SLOTTED TUBE.
4. OPTIONAL TOP TENSION CABLE (5/16" TYP.) AVAILABLE FOR INCREASED STRENGTH.

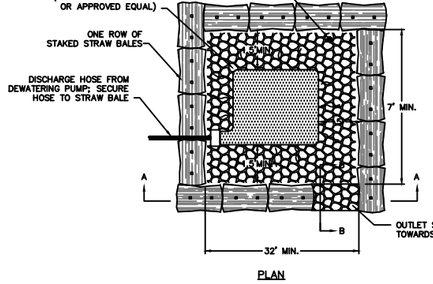
TYPE III FLOATING TURBIDITY CURTAIN
NOT TO SCALE



WATER CONTROL NOTES:

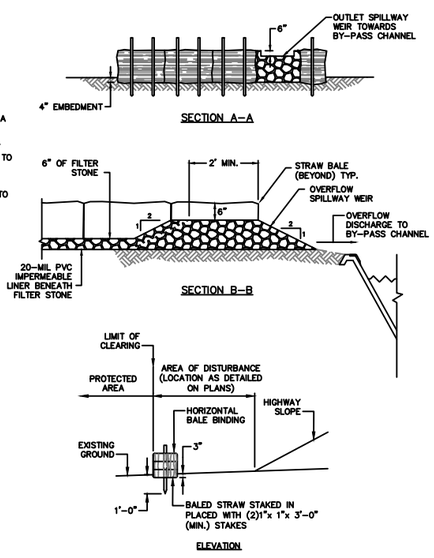
1. TEMPORARY SANDBAGS SHALL CONSIST OF POLYPROPYLENE LARGE SANDBAGS, BULK BAGS OR APPROVED EQUAL, AND SHALL BE FILLED WITH SAND CONFORMING TO SUBSECTION M1.04.0 (TYPE B) OF THE MASSDOT STANDARD SPECIFICATIONS.
2. INSTALL DURING PERIOD OF LOW-FLOW IN BROOK. MONITOR WATER CONTROL SYSTEM DAILY. PROMPTLY CORRECT SEEPAGE, BREAKAGE, OR OTHER EVIDENCE OF MOVEMENT TO ENSURE THAT TEMPORARY COFFERDAM(S) AND WATER BYPASS CONVEYANCES REMAIN STABLE AND FUNCTIONING AS INTENDED.
3. MAINTAIN CRUSHED STONE STUMP AND PUMPS AS NECESSARY TO MAINTAIN DEWATERED CONDITIONS WITHIN COFFERDAMMED AREAS SUFFICIENT FOR COMPLETION OF WORK AND PLACEMENT PROPOSED MATERIALS UNDER SAFE, CONTROLLED CONDITIONS.
4. REMOVE ALL SANDBAGS, ACCUMULATED SEDIMENT, AND OTHER COFFERDAM MATERIALS AFTER IN-RIVER CONSTRUCTION IN RESPECTIVE PHASE IS COMPLETE

TEMPORARY LARGE SANDBAG COFFERDAM (BULK BAGS OR APPROVED EQUAL)
NOT TO SCALE



NOTES:

1. STRAW BALES FOR EROSION CONTROL SHALL CONFORM TO SECTION 767 OF THE STANDARD SPECIFICATIONS INCLUDING MATERIALS AND CONSTRUCTION METHODS.
2. BALES OF STRAW SHALL BE FASTENED WITH WIRE AND HAVE A MINIMUM SIZE OF 1'x1.5'x3'.
3. FILTER STONE SHALL CONSIST OF 1-1/2 INCH STONE CONFORMING TO SUBSECTION M2.01.1 OF THE STANDARD SPECIFICATIONS.
4. FILTER FABRIC SHALL CONFORM TO A TYPE I FABRIC AS INCLUDED WITHIN SECTION M9.50.0 OF THE STANDARD SPECIFICATIONS.



NOTES:

1. THE DEWATERING BAG, DIRTBAG® DB55 OR APPROVED EQUAL, SHALL BE HEAVY DUTY AND CONSIST OF A NONWOVEN BAG SEWN WITH A DOUBLE NEEDLE MATCHING USING A HIGH STRENGTH THREAD.
2. EACH DEWATERING BAG SHALL HAVE A FILL SPOUT LARGE ENOUGH TO ACCOMMODATE A 4-INCH DISCHARGE HOSE. THE BAG SHALL BE PROVIDED WITH STRAPS TO SECURE THE HOSE AND PREVENT PUMPED WATER FROM ESCAPING WITHOUT BEING FILTERED.
3. MAINTAIN DEWATERING BAG(S) AS NECESSARY TO EFFICIENTLY FILTER SEDIMENT OR PASS WATER AT A REASONABLE RATE. USE OF EXCESSIVE FLOW RATES OR OVERFILLING DIRTBAG® WITH SEDIMENT WILL CAUSE RUPTURES OF THE BAGS OR FAILURE OF THE HOSE ATTACHMENT STRAPS.
4. DISPOSE OF DEWATERING BAG AND CONTENTS AT OFF-SITE DISPOSAL FACILITY IN ACCORDANCE WITH THE APPROVED SOIL MANAGEMENT PLAN OR AS DIRECTED BY ENGINEER.
5. INSTALL DEWATERING BAG AND CRUSHED STONE BEDDING WITH A SLOPE SO INCOMING WATER FLOWS DOWNHILL THROUGH THE BAG WITHOUT CREATING MORE EROSION. STRAP THE NECK OF DEWATERING BAG TIGHTLY TO THE DISCHARGE HOSE.

TEMPORARY DEWATERING BASIN WITH FILTER BAG

–SILVER MAPLE (ACER SACCHARINUM, FACW)

UNLESS OTHERWISE NOTED ON LANDSCAPE PLAN, SELECT AT LEAST 2 OF THE FOLLOWING SPECIES IN EQUAL QUANTITIES
–RED MAPLE (ACER RUBRUM, FAC)
–YELLOW BIRCH (BETULA ALLEGHANIENSIS, FAC)
–BALSAM FIR (ABIES BALSAMEA, FAC)

ORNAMENTAL TREE
TOTAL QTY: 258

UNLESS OTHERWISE NOTED ON LANDSCAPE PLAN, SELECT AT LEAST 3 OF THE FOLLOWING SPECIES IN EQUAL QUANTITIES
–GRAY BIRCH (BETULA POPULIFOLIA, FAC)
–AMERICAN HORNBEAM (CARPINUS CAROLINIANA, FAC)
–ALTERNATE LEAF DOGWOOD (CORNUS ALTERNIFOLIA, FACU)
–SHADBUSH (AMELANCHIER LAEVIS, NI)

SHRUBS
TOTAL AREA: 30,000 SF

SELECT AT LEAST 2 OF THE FOLLOWING SPECIES IN EQUAL QUANTITIES, PLANTED AT 6' O.C.
–MEADOWSWEET (SPIRAEA LATIFOLIA, FACW)
–STEEPLEBUSH (SPIRAEA TOMENTOSA, FACW)
–SPECKLED ALDER (ALNUS INCANA, FACW)
–RED CHOKEBERRY (ARONIA ARBUTIFOLIA, FACW)
–WINTERBERRY HOLLY (ILEX VERTICILLATA, FACW)

SELECT AT LEAST 2 OF THE FOLLOWING SPECIES IN EQUAL QUANTITIES, PLANTED AT 6' O.C.
–BLACK CHOKEBERRY (ARONIA MELANOCARPA, FAC)
–SWEET PEPPERBUSH (CLETHRA ALNIFOLIA, FAC)
–GRAY DOGWOOD (CORNUS RACEMOSA, FAC)
–NANNYBERRY (VIBURNUM LENTAGO, FAC)
–SHEEP LAUREL (KALMIA ANGUSTIFOLIA, FAC)
–WITCH HAZEL (HAMAMELIS VIRGINIANA, FACU)

EXISTING TREE TO REMAN

PLANTING NOTES:

1. ALL PLANTING MATERIAL TO BE NURSERY GROWN STOCK SUBJECT TO A.A.N. STANDARDS
2. THE CONTRACTOR SHALL SUPPLY ALL PLANTS IN QUANTITIES SUFFICIENT TO COMPLETE THE WORK SHOWN ON THE DRAWINGS AND LISTED IN THE PLANT LIST. IN THE EVENT OF A DISCREPANCY BETWEEN QUANTITIES SHOWN IN THE PLANT LIST AND THOSE REQUIRED BY THE DRAWINGS, THE LARGER NUMBER SHALL APPLY.
3. PRECISE LOCATION OF ITEMS NOT DIMENSIONED ON THE PLAN ARE TO BE FIELD STAKED BY THE CONTRACTOR AND SHALL BE SUBJECT TO THE REQUIREMENTS SPECIFIED IN THE PREVIOUS NOTE.
4. ALL SHRUB MASSINGS AND TREE PITS SHALL BE MULCHED TO A DEPTH OF 3" WITH SHREDDED PINE BARK MULCH.
5. TREES SHALL NOT BE STAKED UNLESS OTHERWISE NOTED.
6. THE CONTRACTOR IS RESPONSIBLE FOR ANY DAMAGED VEGETATION AND SHALL REPLACE OR REPAIR ANY DAMAGED MATERIAL, AT HIS OWN EXPENSE. THE CONTRACTOR SHALL CONTACT "CALL BEFORE YOU DIG" AT 1–800–922–4455 PRIOR TO CONSTRUCTION.
7. ALL SHRUB AND GROUNDCOVER PLANTING AREAS SHALL HAVE CONTINUOUS BEDS OF TOPSOIL 12" DEEP. ALL SOD AND HYDROSEED AREAS SHALL HAVE A MINIMUM TOPSOIL BED OF 6".
8. THE CONTRACTOR IS RESPONSIBLE FOR LOCATING ALL UTILITIES IN THE FIELD. WHERE PLANT MATERIAL MAY INTERFERE WITH UTILITIES, THE CONTRACTOR SHALL NOTIFY THE LANDSCAPE ARCHITECT TO COORDINATE THEIR INSTALLATION.
9. FOR PLANTING SOIL MIX, SEE SPECIFICATIONS OR PLANTING DETAILS.
10. ALL EXISTING RILL, GULLY OR CHANNEL EROSION SHALL BE FILLED WITH APPROPRIATE BACKFILL MATERIAL, FINE RAKED, SCARIFIED AND STABILIZED WITH APPROPRIATE VEGETATIVE MATERIAL AND / OR APPROPRIATE SEDIMENTATION AND EROSION CONTROL MEASURES.
11. ADJUSTMENTS IN THE LOCATION OF THE PROPOSED PLANT MATERIAL AS A RESULT OF EXISTING VEGETATION TO REMAIN SHALL BE APPROVED BY THE LANDSCAPE ARCHITECT PRIOR TO INSTALLATION.
12. THE CONTRACTOR IS RESPONSIBLE FOR ALL MAINTENANCE REPAIR AND REPLACEMENT OF PLANT MATERIAL, AS REQUIRED, FOR THE DURATION OF THE PROJECT AND SUBSEQUENT WARRANTY PERIOD.
13. PLANTINGS INSTALLED IN THE DRY SUMMER MONTHS AND / OR LAWN SEEDED OUT OF SPRING OR FALL PERIODS, IF ALLOWED BY OWNER, WILL REQUIRE AGGRESSIVE IRRIGATION PROGRAMS AT THE CONTRACTOR'S EXPENSE, UNLESS OTHERWISE DIRECTED BY THE OWNER.
14. UPON COMPLETION OF PLANTING, REMOVE FROM SITE ALL EXCESS SOIL, MULCH, AND MATERIALS AND DEBRIS RESULTING FROM WORK OPERATIONS. CLEAN UP SHOULD BE COMPLETED AT THE END OF EACH WORKING DAY. RESTORE TO ORIGINAL CONDITIONS ALL DAMAGED PAVEMENTS, PLANTING AREAS, STRUCTURES AND LAWN AREAS RESULTING FROM LANDSCAPING OPERATIONS.
15. CONTRACTOR SHALL SURVEY, LOCATE, AND PROTECT ALL TREES WITHIN AREAS SHOWN AS "EXISTING VEGETATION TO REMAIN" WITHIN THE DEVELOPMENT ENVELOPE FOR REVIEW BY L.A. PRIOR TO CLEARING OPERATIONS.
16. CONTRACTOR TO RESEED ALL DISTURBED AREAS.

UTILITY NOTE

THE CONTRACTOR SHALL BE RESPONSIBLE FOR NOTIFYING "DIG SAFE" AT 811 OR 888–344–7233 TO ARRANGE FOR MARKING OUT EXISTING UNDERGROUND UTILITIES AT LEAST TWO WORKING DAYS PRIOR TO EXCAVATION.

THE UNDERGROUND UTILITIES DEPICTED HEREON ARE BASED ON FIELD LOCATION OF VISIBLE FEATURES, MAPS AND PLANS OF RECORD, UTILITY MAPPING OR OTHER SOURCES OF INFORMATION. THE ENGINEER MAKES NO GUARANTEE THAT THE UNDERGROUND UTILITIES SHOWN COMPRISE ALL SUCH UTILITIES IN THE AREA, EITHER IN SERVICE OR ABANDONED. THE ENGINEER FURTHER DOES NOT WARRANT THAT THE UNDERGROUND UTILITIES SHOWN ARE IN THE EXACT LOCATION INDICATED ALTHOUGH THE ENGINEER DOES DECLARE THAT THEY ARE DEPICTED AS ACCURATELY AS POSSIBLE FROM INFORMATION AVAILABLE. THE ENGINEER HAS NOT PHYSICALLY LOCATED THE UNDERGROUND UTILITIES.
