Subject: City of Haverhill, MA NPDES Permit #MA 0101621
Consent Decree Submittal (Civil Action No. 16-11698-IT)
Compliance Report Number 16

Dear Ms. Kudarauskas:

Enclosed is Compliance Report No. 16 as required by Section IX.67 of the Consent Decree. This report is for January1, 2024 through June 30, 2024, reporting period.

If you require additional information, please call me at (978) 374-2382.

Sincerely,

Robert E. Ward
DPW Director

List Of Tables

SECTION 1 INTRODUCTION

1.1 BACKGROUND

The United States Environmental Protection Agency (EPA), Massachusetts Department of Environmental Protection (MassDEP), and the City of Haverhill entered into a Consent Decree to require the City to take measures necessary to meet the requirements of the Clean Water Act and the Massachusetts Clean Water Act, and to achieve and maintain compliance with the Small Municipal Separate Stormwater Sewer System (MS4) General Permit and the Publicly Owned Treatment Works (POTW) Permit, and all applicable federal and state regulations. The effective date of the Consent Decree is November 10, 2016.

As part of the Consent Decree, the City is required to submit a Compliance Report to EPA and MassDEP for the previous six-month period, referred to as a "Reporting Period." The bi-annual Reporting Periods run from January through June and July through December, with the Compliance Reports due on April 30th and October 31st for the previous period.

The goal of this Compliance Report is to provide the EPA and MassDEP an updated summary of the work performed by the City to achieve and maintain compliance over the course of the Reporting Period.

1.1 VACANT POSITIONS

The Water/Wastewater Engineer position remains vacant. Every effort continues to be made to fill this critical role. At this time, the City is also working to hire two qualified collections system operators, a senior operator and a maintenance mechanic for the WWTP. The Collection System Supervisor position is advertised for hire as an anticipated opening. The City continues to look for a long-term solution for this critical role. This position is currently being filled by a former City Employee.

1.2 REPORT ORGANIZATION

The Compliance Report is divided into several sections including:

- Section 2 IDDE Program
- Section 3 SSO and Building/Private Party Backup Events
- Section 4 Construction Site Inspection and Enforcement Program
- Section 5 General Status
- Section 6 Secondary Treatment Bypass
- Section 7 CMOM Corrective Action Plan (per MassDEP request)

Each section summarizes the City's actions, activities, and events that have occurred during the Reporting Period in accordance with the Consent Decree.

1.3 CERTIFICATION STATEMENT

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

SECTION 2 IDDE PROGRAM

2.1 INTRODUCTION

The City identified and inspected 1,200 stormwater outfalls (thirteen of these outfalls are shared stormwater/combined sewer overflow (CSO) outfalls) as part of the 2014/2015 Stormwater Outfall Inspection Report. Based on the findings, the City established a draft schedule of prioritized inspections.

In 2017, the City prepared the "Illicit Discharge Detection and Elimination (IDDE) Manual." The manual identified the procedures that the City will follow to continue their comprehensive inspections of its stormwater outfalls, upstream system investigations, and enforcement procedures when an illicit connection is identified. Most recently, the IDDE Manual was updated in 2020 to be in compliance with the City's MS4 permit.

The IDDE Manual can be found on the City's Stormwater website at:
www.cityofhaverhill.com/departments/storm_water_program/index.php

2.2 CURRENT REVISED PRIORITY LISTING

The City continues to conduct IDDE sampling and update priorities based on field investigation and lab analysis testing results. The current IDDE investigation priorities as of July 2024 are shown in Table 2-1. The current priorities categories reflect the following inventory: four Problem Priority outfalls; three High Priority outfalls; and thirty-four Low Priority outfalls. Table 2-1 has been updated with the most recent sampling results for each outfall. The priority listing of outfalls, with sample results, is also available at the City's stormwater website.

https://www.cityofhaverhill.com/departments/storm_water_program/index.php

2.3 IDDE INVESTIGATION PROGRESS REPORTING

Table 2-2 shows the City's progress to date on their IDDE investigations during the reporting period (January through June 2024). Updated results for outfall catchment areas have been updated on Table 2-2 and IDDE catchment investigation maps in Appendix. Table 2-3 shows the City's current list of priority outfalls for maintenance.

Using GIS, the City identified a total of 26.12 miles of storm drain piping and 2,617 drainage manholes and catch basins in the tributary area upstream of the outfalls included in the Priorities List as Problem, High, Low priorities. The total length investigated is included and updated from previous reporting for a cumulative percentage investigated. Some outfalls are considered fully investigated if there is no flow in an upstream asset.

During this reporting period 7 outfalls were re-inspected from the Outfall Maintenance Priority Table (2-3) for dry weather flow. Four of the seven outfalls inspected during this reporting period were observed as having no flow during dry weather or were completely buried, three of the outfalls were incorrectly marked assets within our GIS system and removed from our list as well as the table. The buried outfalls that require further location have been assigned work order numbers and will undergo future maintenance.

2.4 IDENTIFIED ILLICIT CONNECTIONS AND CURRENT PRIORITY LIST STATUS RESOLUTION

The ongoing and cumulative status of the City's efforts to remove any identified illicit connections or discharges is summarized in Table 2-4.

Merrimack River Basin Outfalls – MR1164 has been removed from the priority list as it is seasonal groundwater flow from top of catchment.

Little River Basin Outfalls – LR0952 has been removed from the priority list as it is connected to athletic field drainage and is considered an excluded outfall. Upstream investigation showed no flow from catchment not originating from athletic field drainage.

Unknown Basin Outfalls - UNK0951– has been removed from the priority list as it is connected to athletic field drainage and is considered an excluded outfall. UNK1020 was removed from the priority list as sampling results were within acceptable permit limits. UNK1680 was removed from the priority list for no flow.

Pentucket Lake Basin Outfalls – PL0891 was sampled for wet weather flows and sample results are shown on table 2-1.

Detention Pond Inlets Outfalls – DPI0696 was removed from the priority list as it is connected to athletic field drainage and is considered an excluded outfall.

TABLE 2- 4 SUMMARY OF ILLICIT DISCHARGES IDENTIFIED BY BASIN AND CURRENT STATUS
(January through July 2024)

Description		Illicit Discharge/Connection Verified				Ongoing Illicit Discharge Removal Activities					Final Illicit Connection Removal Actions				
Basin ID	Outfall ID	Date Verified	Address Location	Type of Discharge[1]	Estimated Flow	Removed?	Reasons Why Not	Schedule for Removal	Reason why expedited	Legal Actions against Private Property Owners	Actions Taken (with Dates)	Date Connection Eliminated	Est. Cost of Removal	Estimated Volume Removed (gallons)	Assessment: Is the City in compliance with the schedule?
Little River	LR1260	10/26/2017	29 Union Street	Single family broken sewer	400 gpd	not removed	gave extension	Was removed on 2/24/18			Catchment investigation completed on 10/10/2020. City currently conducting sewer separation project			60,000	
Merrimack River	MR1164	11/19/2016	Market Basket Parking Lot	groundwater into drain	Seasonal Flow/ Not able to estimate	N/A	N/A	N/A	N/A	N/A	This dry weather flow appears to be from a groundwater discharge into the drainage system across a parking lot. Additional testing is required to confirm bacteria source is groundwater.	N/A	N/A	N/A	Yes, the City is in compliance with resolving this "illicit discharge".
	MR1109	12/21/2020	350 Water St	IDDE conducted and needs further investigation to determine the source.	500gpd	not removed	verifying bacteria counts				CCTV conducted on 12.21.2020 no defects found. Flow appears to be from top of catchment from depression/wetland flowing through drain. Additional CCTV required in nearby sewer lines to confirm no infiltration				Yes, the City is in compliance
Pentucket Lake	PL0891	10/5/2016	Marsh Avenue	leaking sewer/ exfiltration	Not able to estimate	X	Sewer replacement costs/lengths	2021	This connection is being	NOV	10/5/18-10/10/18: SMH-2190-point repair and manhole	Dec-21	$446,000	-	The Marsh Avenue sewer repair

TABLE 2- 4 SUMMARY OF ILLICIT DISCHARGES IDENTIFIED BY BASIN AND CURRENT STATUS
(January through July 2024)

Description		Illicit Discharge/Connection Verified				Ongoing Illicit Discharge Removal Activities					Final Illicit Connection Removal Actions				
Basin ID	Outfall ID	Date Verified	Address Location	Type of Discharge[1]	Estimated Flow	Removed?	Reasons Why Not	Schedule for Removal	Reason why expedited	Legal Actions against Private Property Owners	Actions Taken (with Dates)	Date Connection Eliminated	Est. Cost of Removal	Estimated Volume Removed (gallons)	Assessment: Is the City in compliance with the schedule?
							are extensive; cost exceeds discretionary funds; new fund required in next fiscal year to complete project		removed as quickly as possible and dependent on the availability of funds within the fiscal year.		rehabilitation complete. 10/11/18-10/16/18: Installation of CIPP main line liner on Main Street 10/17/18-10/23/18: Installation of CIPP main line liner on Marsh Avenue 10/24/18: Began installing CIPP of sewer laterals. Groundwater is too high causing flooding in homes. Project on hold until mid-end March. Project is complete. 6/9/2020: illicit connection located at lateral from laundromat, owner notified to repair, repaired as of December 2021, follow-up testing to be completed next reporting period				project was bid on and awarded to National Water Main Cleaning Company and contract had to be extended to 6/30/19 due to high groundwater. Project was completed by the end of June 2019 but after review of CCTV, it was determined that more CCTV needs to be conducted and 1 defect in lining needs to be repaired.

TABLE 2- 4 SUMMARY OF ILLICIT DISCHARGES IDENTIFIED BY BASIN AND CURRENT STATUS (January through July 2024)

Description		Illicit Discharge/Connection Verified				Ongoing Illicit Discharge Removal Activities					Final Illicit Connection Removal Actions				
Basin ID	Outfall ID	Date Verified	Address Location	Type of Discharge[1]	Estimated Flow	Removed?	Reasons Why Not	Schedule for Removal	Reason why expedited	Legal Actions against Private Property Owners	Actions Taken (with Dates)	Date Connection Eliminated	Est. Cost of Removal	Estimated Volume Removed (gallons)	Assessment: Is the City in compliance with the schedule?
	UNK0951	11/1/2017	Brook Street	Leaking sewer running through drain	Not able to estimate	not removed	Not able to fix due to weather	As soon as weather permits	-	-	Catchment investigation shows flow originating from upstream athletic field drainage	4/17/2018	$4,277	-	Yes, the City is in compliance
	UNK0955	10/14/2016	South Main Street	Contaminated private line discharges to City line.	Not able to estimate	not removed	Unable to complete investigation due to weather	As soon as weather permits			Drain manholes will be exposed and CCTV'd when weather permits to identify source of illicit flow. CCTV conducted showing no infiltration from shopping plaza, additional CCTV will continue in upcoming reporting period.				
	UNK1166	6/11/2020	Franzone Drive	Upstream contamination needs additional IDDE	10gpm est	not removed	CCTV to be completed in next reporting period

											Grand Total =		$463,277	86,481	

SECTION 3 SSO & BUILDING/PRIVATE PARTY BACKUP EVENTS

3.1 SSO ACTIVITY

A chronological list of the sanitary sewer overflows (SSO) and building/private party backup events that occurred during this Reporting Period, are listed in Table 3-1.

Over the Reporting Period, there were a total of one reportable SSO events associated with the City's sewer collection system.

It is important to note that the SSO's associated with the City collection system operations continue to not be a result of pipe capacity deficiencies and the City continues to make significant progress in reducing the number of SSOs that occur in the system, which are attributed to City operations. For this six-month reporting period, the City had one SSOs that were directly attributable to unanticipated City collection system conditions. The EPA reported annual average SSOs in a typical nationwide system is about four SSOs per 100 miles. The City currently has approximately 197 miles of sewer.

Appendix D list the four current basement sewer backups during this reporting period.

TABLE 3-1.SANITIARY SEWER OVERFLOW

SEWERAGE LOCATION INTO STREAM	NO
SSO OWNERSHIP CITY OR PRIVATE	CITY

SECTION 4 CONSTRUCTION SITE INSPECTION AND ENFORCEMENT PROGRAM

4.1 ENFORCEMENT ACTIVITY

At their June 26, 2018, Haverhill City Council meeting, the Council passed and adopted a Pre and Post Construction Stormwater Management Ordinance (Ch. 219) as required by the Consent Decree and MS4 Stormwater permit. Revisions to this Ordinance have been drafted and are undergoing internal legal review to ensure compliance with the current MS4 requirements.

The City received three applications in 2024 seeking approval under the ordinance. One was withdrawn. The City is currently preparing to issue Permit #SWM-24-1 for the redevelopment of the Consentino Middle School and #SWM-24-3 for the redevelopment of land at 51 Merrimack Street in downtown Haverhill. The City additionally received a request to extend Permit #SWM-21-1 for the development of the Sylvan Hill Crossing subdivision off Forest Street. An extension is being prepared for this project.permitted three projects under this ordinance in 2021. No new projects have been filed in 20243.

Thus far, most projects meeting the one acre and MS4 connection requirements have been exempt under the Ordinance due to their being permitted by the Conservation Commission per Massachusetts Stormwater regulations and Wetlands Protection Act. In addition, the Ordinance has served as a deterrent, as there have been instances where projects have been redesigned to reduce proposed disturbances to less than one acre. The draft ordinance updates maintain an opportunity for exemption from the MS4 Ordinance, but applicants must have first demonstrated full compliance with the new Ordinance during another formal permitting process, i.e., Conservation Commission, Planning Board, or City Council.

The City continues to monitor and enforce the requirements of the ordinance at Sylvan Hill Crossing and Michael Anthony Way (#SWM-23-1).

SECTION 5 GENERAL STATUS

5.1 INTRODUCTION

This section summarizes the actions taken by the City of Haverhill to achieve Consent Decree compliance within the Reporting Period.

For the fifteenth reporting period (July through December 2023) there was one deliverable and/or activities due within that timeframe to achieve compliance. The deliverable/activity is shown in Table 5-1 below.

In June 2021, The City Council passed a Loan Authorization for $7,037,000, for sewer improvements. This project includes replacing sewer lines in various locations, installing a cured in place lining in a 54-inch sewer main, and rehabbing sewer lines in other various locations. In October of 2022, the City submitted the Locke Street Preliminary Design Report as well as updated Final Long Term Control Plan schedules for the Locke Street and Wastewater Treatment Plant projects.

The City and Wright-Pierce completed the design for Phase 1 Locke Street Sewer separation in October 2023. However, there is an issue with an easement for a stormwater outfall pipe into Little River through MBTA and National Grid properties. EPA and MASSDEP agreed to give the City an extension to acquire these easements. However, Due to a back log with MBTA, the City still has not secured these easements.

The timeline to acquire the easements are shown in Table 5-1

TABLE 5- 1 MBTA/GREYSTONE TIMELINE

Date	Task	Company
12/12/22	called/emailed Greystone to get information on process	WP
01/10/23	Borings application submitted w/ check	WP
01/20/23	new check mailed	City
02/02/23	Confirmed check was received	Greystone
03/02/23	Told WP it is a minimum 90 day process & cannot contact MBTA on status	Greystone
03/23/23	asked if could add survey to existing boring application.	WP
03/30/23	told that cannot add survey without restarting clock on borings application	Greystone
~ 4/12/23	submitted survey application	WP
after 4/19/23	check for survey was mailed	City
05/10/23	still said they didn't have survey check	Greystone
05/11/23	WP called Greystone as been > 90 days for boring application. Liam said he will express urgency to the depts	WP
06/02/23	Conditionally accepted boring application	Greystone
07/18/23	some of depts approved survey application	Greystone
08/08/23	MBTA officially approved boring application	Greystone
08/23/23	asked for a meeting w/ Greystone, MBTA, MassDEP, WP	City
08/25/23	mailed additional checks for boring license agreement	City
09/05/23	meeting with all of the parties	All
11/16/23	boring license executed	Greystone
12/11/23	boring Keolis agreement was emailed to Keolis	WP
01/23/24	borings completed	SoilX
02/22/24	Keolis had to cancel flaggers - survey was rescheduled	Keolis
03/06/24	survey work was completed	Doucet
8/6/2024	email recommending application be submitted as review time is 4 - 5 months	Greystone
08/16/24	submitted easement/design application	WP
08/20/24	check was mailed	City
09/24/24	GZA submitted the track monitoring system design & WP is reviewing it	WP
09/30/24	Emailed track monitoring system design and updated drawings to MBTA	WP

Wright-Pierce continues the design for Phase 2 CSO separation by conducting a field survey. We will report on the progress in our next Compliance report.

Wright-Pierce Completed the City's Water Pollution Abatement Facility's Rehabilitation and Upgrade Project Evaluation in February of 2023. The City Released an RFQ that meets the requirements of the American Rescue Plan Act (ARPA) and Selected Wright-Pierce. The RFQ includes preliminary design, final design, bidding, and construction. Preliminary design kicked off in June of 2024.

The City has implemented a new Computerized Maintenance Management System (CMMS), Cityworks. The system's CCTV module was the last piece to be implemented and will be utilized to develop consequence of failure, likelihood of failure, and overall "risk" values through CCTV and will be integrated into the City's long-term CIP. Cityworks also has reporting capabilities for outfall inspection and investigation, catch basin cleaning and inspection, and any corrective or preventative maintenance associated with sewer and stormwater (lift station checks, cleaning of sewer lines, etc.) Cityworks is also being utilized within the wastewater treatment plant for corrective and preventative maintenance.

SECTION 6 SECONDARY TREATMENT BYPASS

6.1 INTRODUCTION

The intent of this section is to summarize the secondary treatment bypass events that occurred at the City of Haverhill's Water Pollution Abatement Facility during the reporting period, January through June 2024.

6.2 BYPASS EVENTS

There were three secondary treatment bypass events that occurred during the reporting period, which are listed in Table 6-1. The table provides all information required under the Consent Decree.

TABLE 6- 1 SECONDARY TREATMENT BYPASS EVENTS

SECONDARY TREATMENT BYPASS EVENTS

Bypass Event	#	2024-01		2024-02		2024-03	
Date of Bypass		1/10/2024		3/10/2024		5/30/2024	
Date of Rainfall		1/10/2024	1/11/2024	3/10/2024	3/11/2024	5/30/2024	5/31/2024
Weather Rainfall	Inches	1.87	0.03	1.20	0.13	1.38	0.00

Secondary Clarifier #3 Depth of Blanket	ft	10.0	2.5	7.5	4.0	12.5	2.5
Secondary Clarifiers Online	#	3	3	3	3	3	3

Note:

Gaps for requested data are due to secondary treatment bypass events occuring on a non-sampling day.

6.3 RAINFALL DATA

The Facility's operating data is captured and recorded by the SCADA/WIMS Systems each day from 12:00 AM until 11:59 PM. The National Oceanic and Atmospheric Administration (NOAA) weather station recording procedures require that precipitation is recorded from 7:00 AM to 6:59 AM, with the data observed on the second day. The date inconsistencies between WPAF and NOAA data result

SECTION 7 CMOM CORRECTIVE ACTION PLAN

7.1 INTRODUCTION

Pursuant to the Consent Decree, the City of Haverhill submitted the Capacity, Management, Operation, and Maintenance Program Assessment Corrective Action Plan (CMOM), dated February 22, 2017, to MassDEP and EPA. In their review letter dated August 3, 2017, MassDEP requested that a summary of the status of CMOM related corrective actions that occurred during the reporting period be included in the Compliance Reports.

7.2 CMOM CORRECTIVE ACTIONS

The CMOM identified twenty-six deficiencies, their recommended corrective actions, and an implementation schedule, which are listed in Table 7-1. Table 7-1 was simplified for readability purposes. Item 10 was duplicated and was deleted in Compliance Report Number 10, thus now equaling twenty-five deficiencies.

Table 7-1 has been updated to show all remaining deficiencies and the City's progress. To view the complete table see the previous year submission located here.

7.3 ADDITIONAL CMOM-RELATED ACTIVITIES

In conjunction with the corrective activities, the City has also performed additional activities as outlined and recommended in the CMOM Program, which includes collection system maintenance and construction activities. The expenses related to collection system maintenance activities for this reporting period are listed in Table 7-2.

TABLE 7- 1 CMOM DEFICIENCIES COMPLETED

Action #	Deficiency	Recommended Corrective Action	Implementation Schedule	Status
1	The City does not have a formal long-term plan to mitigate SSO.			This action item has been completed and closed. Please see Compliance Report 12 for final comments.
2	The City does not have a comprehensive system to prioritize investigations, repairs, and rehabilitation.			This action item has been completed and closed. Please see CD12 for final comments.
3	The City does not have updated job descriptions that match technical requirements for a modern collection system utility.			This action item has been completed and closed. Please see CD12 for final comments.
4	Although the City training program includes some key safety training, staff would benefit from a formalized safety and technical training program.			This action item has been completed and closed. Please see CD12 for final comments.
5	Although the City uses MaintStar to track customer complaints, they do not use the database to			This action item has been completed and closed. Please see CD12 for final comments.

Action #	Deficiency	Recommended Corrective Action	Implementation Schedule	Status
	prioritize preventative maintenance.			
6	The City lacks a comprehensive, risk-based approach to maintenance planning.			This action item has been completed and closed. Please see CD12 for final comments.
9	The City should update recordkeeping pertaining to private systems			This action item has been completed and closed. Please see CD12 for final comments.
10	The City does not have a finalized version of their capital improvement plan – which will include pump station upgrades, collection system rehabilitation, and WWTP upgrades			This action item has been completed and closed. Please see CD12 for final comments.
12	The City does not have a standard procedure for maintaining safety training records.			This action item has been completed and closed. Please see CD12 for final comments.
13	The City has a general emergency response plan (ERP). The Division recently completed an ERP for responding to SSOs. The			This action item has been completed and closed. Please see CD12 for final comments.

Action #	Deficiency	Recommended Corrective Action	Implementation Schedule	Status
	Division lacks ERP for other collection system emergencies.			
18	Not all pump stations have communication ability. Lack of communication at pump stations has contributed to SSOs.			This action item has been completed and closed. Please see CD12 for final comments.
19	11 pump stations do not have working backup power, though most of these have connections for a portable generator or are small enough to pump out.			This action item has been completed and closed. Please see CD12 for final comments.
21	The City does not have a dedicated location for offloading and dewatering sewer cleaning. The City does not have an enclosed location for storage of their sewer maintenance vehicles.			This action item has been completed and closed. Please see CD12 for final comments.
25	The City lacks public education materials associated with roof leaders and sump pumps.			This action item has been completed and closed. Please see CD12 for final comments.

7.4 REMAINIG DEFICIENCIES

Action Number 7

Deficiency: Local limits need to be updated.

Recommended Corrective Action:

Perform a local limits study and update the limits table in the ordinance (per Appendix E, Sewer Ordinance Review from CMOM Program Assessment and Corrective Action Plan prepared by Woodard & Curran, February 2017).

Implementation Schedule:

Within **one year** after EPA approves the CMOM Action Plan

Status:

Local limits evaluation was finalized and submitted to EPA for review on June 23, 2021, and subsequently approved. The City is planning to present an updated SUO to the Council for approval.

Action Number 8

Deficiency:

The City needs to improve implementation and enforcement of their Sewer Use Ordinance (SUO).

Recommended Corrective Action:

Improve implementation and enforcement of the SUO. Begin mapping Food Service Establishments in GIS and building database of grease trap inspectional data.

Implementation Schedule:
Within **one year** after EPA approves the CMOM Action Plan

Status:
Cityworks (CMMS) has been updated to reflect all food service establishments (FSE) and is updated as new Food Service Wastewater Discharge Permits are issued. All FSE's are inspected annually.

In December of 2020 the City completed draft updates to the SUO for FOG inspection implementation and enforcement, as well as an update to the Enforcement Response Plan. The City is planning to present an updated SUO to the Council for approval.

Action Number 11

Deficiency:

The City has not verified that other air relief valves do not exist. Maintenance of air relief valves has not been performed historically.

Recommended Corrective Action:

Review record drawings and inspect force main routes to confirm location of air relief valves. If located, enter into GIS and schedule routine maintenance in CMMS.

Implementation Schedule:

Within **one year** after EPA approves the CMOM Action Plan

Status:

Ongoing. The City has identified three air release valves for four lift stations including Elliot Street, Lake Street and Fondi Road/Hilldale Lift Station common force main. The City will develop a CityWorks PM schedule following the manufacturer's recommendations. When any other air relief valves are found they will be added to CityWorks PM list.

Action Number 14

Deficiency:

The City does not have formal emergency response training.

Recommended Corrective Action:

Implement a program for training and practicing emergency response.

Implementation Schedule:

Within **one year** after EPA approves the CMOM Action Plan

Status:

The Wastewater Staff have been trained and additional training will be documented in the City's Access File. For minor emergencies, the staff prepares in advance of a weather event (e.g., setting up bypass pumps at the Marginal Pump Station, verifying that equipment has fuel (gasoline, diesel, or propane), along with procuring rental generators. The need for training is incorporated into these routine preparations.

Action Number 15

Deficiency:

The City has a hydraulic model for interceptors and CSOs, but there is no city-wide hydraulic model.

Recommended Corrective Action:

Although developing a comprehensive hydraulic model is not a high priority, Woodard & Curran recommends building out the model as required to address capacity issues and plan for new development as the need arises.

Implementation Schedule:
As Needed

Status: Ongoing
The City's GIS system is updated by City staff on an ongoing basis which will provide a good foundation for a future model.

Action Number 16

Deficiency:

The City does not have adequate staff to perform sufficient preventative maintenance on all 36 pump stations.

Recommended Corrective Action:

Follow the recommendations of the Wastewater Treatment Plant & Collection System Staffing Analysis (Woodard & Curran, 2017) to assign sufficient resources to keep up with required maintenance.

Implementation Schedule:

Within **one year** after EPA approves the CMOM Action Plan

Status: Complete

The City developed a job description for a new Collection System MEO/laborer and hired a qualified candidate. The City outsources many tasks. The Mission Systems improve the monitoring of pump stations resulting in reduced staff time for routine inspections (weekly vs. daily) and more time on preventative maintenance. Three stations are inspected daily while the rest are inspected weekly. All stations are also inspected quarterly, which involves a more in depth inspection.

Action Number 17

Deficiency:

Although there is generally sufficient redundancy of pumps and level controls, some stations require specific upgrades related to redundancy.

Recommended Corrective Action:

The City will utilize the recommendations of the Pump Station Evaluation (Wright Pierce, 2016) to evaluate future rehabilitation.

Implementation Schedule:

Ongoing

Status: Ongoing

The City will be standardizing all their pump stations during upgrades and additional pump stations will be considered for rehabilitation/upgrades as outlined in the Pump Station CIP The City will utilize remaining life of each station, consequence of failure, and station functions. The City has ranked each station based upon its' function. Ejector Station rank 1; Vacuum Prime rank 2; Flooded Suction rank 3; Submersible rank 4**.** Mission alarms are currently installed in all thirty-six lift stations. Design of three more stations are Complete. Contract CWSRF-12419 was awarded June 30, 2024. Construction is planned in the fall of 2024.

Action Number 20

Deficiency:

There is currently no schedule for cleaning sewer lines on a system-wide basis.

Recommended Corrective Action:

The City will utilize a 20-year plan to inspect all sewer pipes calculated to have a consequence of failure value ≥ 3 (approximately 57% of system).

Implementation Schedule:

Will begin to implement program within six **months** after EPA approves the CMOM Action Plan

Status: Ongoing?
The City has purchased their own vac truck. Sewers are designed to achieve self-cleaning velocities. The City has used the Vac-Truck to clean the City's sewers as necessary. The City has added flushing PM's with more flushing being conducted with 246 sewer mains cleaned. Sewer lines are also cleaned prior to planned CCTV inspections. The City, with its consultant Weston and Sampson developed a five-year CCTV program focusing on high-risk areas.

Action Number 22

Deficiency:

The City does not have a list of assets located on rights-of-way. The City has also not developed an SOP for maintenance of rights-of-way and easements.

Recommended Corrective Action:

Identify off-street assets using GIS. Schedule preventative maintenance for maintaining accessibility in CMMS. Develop SOPs for specific easements as necessary, including contacting property owners to obtain keys, etc.

Implementation Schedule:

Within **two years** after EPA approves the CMOM Action Plan

Status: Ongoing

The City has input easements into GIS as assets. These assets will be populated, and SOPs will be made, as well as the development of a preventative maintenance plan. These easements will be added to our CMMS program and a PM schedule will be created for easement inspections. Easement assets are created and can be used in the City's CMMS. An inspection form has been created to evaluate the level of maintenance needed for the easement.

Action Number 23

Deficiency:

There is no systematic program for uncovering manholes that have been paved over.

Recommended Corrective Action:

• Identification of paved over manholes as part of routine.
• Add paved-over manholes to GIS.
• Adding work orders to CMMS for raising paved-over manholes.

Implementation Schedule:

Within **two years** after EPA approves the CMOM Action Plan

Status: COMPLETE
The City's highway department distributes a street paving list to each department. The engineering department investigates those streets and puts a list together of buried manholes. This list is then given to the Highway Department, and they raise the manholes. Paved over manholes are added to GIS on an ongoing basis as they are discovered". A SOP has been developed for identifying, locating, and exposing covered manholes.

Action Number 24

Deficiency:

Although the City has identified areas with high measured inflow, building inspections have not been performed.

Recommended Corrective Action:

The City will perform trial building inspections to a sample of 10% of buildings located in Areas 14 & 23 Infiltration and Inflow Report (CDM Smith, 2011). Sample brochures will be sent out to buildings where inspections are not successfully completed.

Implementation Schedule:

Within **two years** after EPA approves the CMOM Action Plan

Status:

The City is considering this as part of their Phase 3 CSO work. However, recommended corrective action is only practical in separated sewer areas. I/I Brochures are available on the City's Website click here.

Action Number 26

Deficiency:

The City does not have a system-wide manhole inspection program

Recommended Corrective Action:

Perform manhole inspections using NASSCO Level 1 MACP. Prioritize and schedule using the risk-based approach described in Appendices B and F rehabilitation. The City plans to complete manhole inspections while performing pipe inspections.

Implementation Schedule:

Will begin to implement program within **six months a**fter EPA approves the CMOM Action Plan

Status: Complete

Manhole inspections are ongoing as part of pipe inspections. As the City contracts with engineering firms for CCTV work, their scope will also include manhole inspections. The City has implemented NAASCO MACP sewer inspection standards and requires contractors to be NAASCO certified when performing inspections.

The City will ask CCTV venders to perform a MACP level 1 when they CCTV a sewer segment. 123 MACP level 1 inspections were done in the first half of 2023. Level 1 inspections consist of a basic visual inspection of various sections of a manhole and a condition of that section ranging from “poor” to “good” or “sound”. A SOP has been developed for performing NAASCO MACP level 1 inspections.

TABLE 7-2
CMOM-RELATED EXPENSES THAT OCCURRED
DURING REPORTING PERIOD 16 (JANUARY THROUGH JUNE 2024)

Account	CD Report No. 15 Totals:	Account Description
Lift Station Operation and Maintenance	$120,506	Used to fund costs for all maintenance and repair of the wastewater collection system. Haverhill's system includes approximately 200 miles of gravity sewer which includes 8-inch up to 72-inch pipe, 36 pumping stations and 3 siphons under the Merrimack River.
Sewer Assessment & Inspection	$121,746	Used to fund cleaning, CCTV inspection, and assessment of sewer lines and grit removal
Service Contracts	$32,079	Used to fund the annual service contracts for various items in the wastewater department.
Wastewater Infrastructure	$34,489	This account is use for sewer repair miscellaneous items. This is an annual appropriation funded from current year revenues.
Wastewater Capital	$0	Funds are used for expenditures greater than $10,000 with a life greater than 3-years. This is an annual appropriation funded from current year revenues.
Storm Water - Capital	$0	Funds capital expenditures greater than $10,000 with a life greater than 3-years. Funds are annual appropriations from user rates and fees.
Stormwater Expense	$152,331	Funds various expenses related to stormwater system operation and maintenance, street sweeping, federal and state permit requirements, and the downtown flood system. There is currently no revenue source for stormwater expenditures.
Sewer Rehab	$22,468	A capital Funds account uses to repair and replace sewer infrastructure
Primrose Street Phase I Locke Street Sewer Separation Project and sewer replacement	$ 470,705	Phase I includes sewer mains that have reached the end of their useful life.
Pump Station Upgrade CWSRF-12419	$1,975,000	Replace Coffin Avenue, Hanover Street and Alvanos Drive Lift Stations
Total Spent During Reporting Period	$2,929,322

Inspection 808

Outfall Maintenance Inspection

Cityworks

Status: COMPLETE

Priority: **Location:** LR1150 **Inspected By:** Huff, Richard

Observations:

Start Date and Time of Inspection:	2024-03-22T04:00:00.000Z
Inspector Helper:	James Conte
Was Outfall Located:	Yes
Why Was Outfall Not Located:	
Did You Check Immediate Upstream Asset to Determine Direction of Outfall Pipe:	Yes
Why Didn't You Check Immediate Upstream Asset:	
Is Outfall Completely Buried and Need to be Excavated:	No
Picture of Outfall Before Maintenance:	No
Was Outfall Dug Out with Shovels:	No
Does Outfall Require Additional Maintenance:	No
What Additional Maintenance Needs to be Done:	
Picture of outfall after maintenance:	No
End Date and Time of Inspection:	2024-03-22T04:00:00.000Z

Inspection 819
Outfall Maintenance Inspection

Cityworks

Status: OPEN

Priority: **Location:** Corner of River and Margi **Inspected By:** Huff, Richard

Projected Start: 6/24/2024 10:12:14AM **Projected Finish:**

Initiated By: Huff, Richard **Initiated Date:** 6/24/2024 10:12:14AM

Actual Finish:

Insp. Date: 6/22/2024 7:30:00AM

Closed By: **Date Closed:**

Work Order Id:

Observation: Unable to access outfall due to location; fence and heavy vegetation.

Repairs:

Recommendation:

Inspection 819
Outfall Maintenance Inspection

Cityworks

Status: OPEN

Priority: **Location:** Corner of River and Margi **Inspected By:** Huff, Richard

Observations:

Start Date and Time of Inspection:	2024-06-22T18:13:00.000Z
Inspector Helper:	None
Was Outfall Located:	No
Why Was Outfall Not Located:	Fence preventing entry to area and excess vegetation
Did You Check Immediate Upstream Asset to Determine Direction of Outfall Pipe:	No
Why Didn't You Check Immediate Upstream Asset:	Lack of equipment
Is Outfall Completely Buried and Need to be Excavated:	Yes
Picture of Outfall Before Maintenance:	No
Was Outfall Dug Out with Shovels:	No
Does Outfall Require Additional Maintenance:	Yes
What Additional Maintenance Needs to be Done:	Buried and requires a digout, and clearing of vegetation
Picture of outfall after maintenance:	No
End Date and Time of Inspection:	2024-06-22T20:00:00.000Z

Inspection 821
Outfall Maintenance Inspection

Cityworks

Status: CLOSED

Priority: **Location:** At intersection of Lake st a **Inspected By:** Huff, Richard

Projected Start: 6/21/2024 10:28:00AM
Projected Finish:
Initiated By: Huff, Richard
Initiated Date: 6/24/2024 10:28:31AM

Comments:

Comments	Date	Author
On 1-14-2024 Received a call from Sam stating that Water Department called in, Sewer is coming in to basement, upon arrival we checked City Line and was running fine, but we got the Jet Truck and flushed and was a partial blockage in the line, released and stopped the sewer coming in to the house, after investigating the rain leader was going in to sewer line, we have to camara the main to see the condition due to is only 1 manhole on Lockwood St.	1/15/2024 3:36:27P	Rosario, Pedro

Resident at number 32 Allen St., Joseph Young called the plant to report a blockage in his pipe and wished to have the city line checked for any backup. Arriving at the call we found that the city line was running properly in without issue, we entered the basement to find the house pit and lateral was backed up but contained to the pit in the basement. Advise the homeowner to call a plumber to rectify the house issue.	3/22/2024 10:46:12A	Day, Zebulun
